COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Accurately describe and contrast theories in environmental philosophy (from the fields of ethics, aesthetics, political philosophy and, when relevant, epistemology and metaphysics).
- 2. Critically evaluate theories in environmental philosophy (from the fields of ethics, aesthetics, political philosophy and, when relevant, epistemology and metaphysics).
- 3. Apply selected environmental philosophies to current environmental issues.

Objectives:

Upon successful completion of the course, students will be able to:

- 1. Explain the relationship between environmental philosophy and environmental science.
- 2. Describe and critique the traditional ethical theories that are relevant to environmental ethics (e.g. utilitarianism, deontology and natural law theory).
- 3. Evaluate the extent to which these theories place value upon various aspects of the natural environment (e.g. humans, animals, plants, species, ecosystems).
- 4. Describe and critique non-traditional theories in environmental ethics (e.g. biocentric ethics and the land ethic).
- 5. Describe and evaluate philosophies which emphasize a more metaphysical approach to environmental philosophy (e.g. Deep Ecology).
- 6. Describe and critique environmental philosophies that examine the interplay between the environment and social or economic issues (e.g. environmental justice, social ecology, and ecofeminism).
- 7. Describe and evaluate various theories in environmental aesthetics.
- 8. Compare and contrast how various environmental philosophies apply to selected global and/or local environmental issues or problems.

Topics and Scope:

- I. Environmental Philosophy in Relation to Environmental Science
 - A. The role of philosophy in environmental studies
 - B. The role of science in environmental studies
 - C. The relationship between philosophy and science in environmental studies
- II. Traditional Ethical Theories in Environmental Philosophy
 - A. Utilitarianism
 - B. Rights theory
 - C. Contractarian theory
 - D. Natural Law theory
 - E. Deontology
- III. Non-traditional Ethical Theories in Environmental Philosophy
 - A. Life-centered (Biocentric) ethics
 - B. The Land Ethic (Ecocentrism)
 - C. Deep Ecology
- IV. Economic, Political and Social Issues in Environmental Philosophy
 - A. Environmental justice/environmental racism
 - B. Social ecology
 - C. Ecofeminism
- V. Environmental Aesthetics
 - A. Thoreau: Wildness and nature aesthetics
 - B. Environmental science as a basis for environmental aesthetics
 - C. Artistic criteria for environmental aesthetics
- VI. Philosophical Theories in Relation to Selected Environmental Issues
 - A. Environmental philosophy and population growth
 - B. Environmental philosophy and agriculture
 - C. Environmental philosophy and global warming
- VII. (Optional) Spiritual/Religious Approaches to Environmental Philosophy
 - A. Native American traditions
 - B. Buddhist and/or Hindu traditions
 - C. Taoism
 - D. Christianity

Assignment:

- 1. Regular reading assignments (20 30 pages a week)
- 2. Regular reading assessment: such as reading logs, brief summaries, brief response papers, or comprehension quizzes
- 3. Midterm assessments: examinations or short papers which demonstrate student ability to describe and critically evaluate positions in environmental philosophy and/or apply environmental philosophy to current environmental issues
- 4. Final assessment: exam, paper, or project that demonstrates student ability to describe and critically
 - evaluate positions in environmental philosophy and/or apply environmental philosophy to current environmental issues
- 5. May include (up to 10%) a creative assignment (e.g. original poetry, art, performance) that involves creatively expressing or illustrating an environmental perspective
- 6. May include (up to 10%) participation

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Short reading responses, midterm papers, final paper

Writing 30 - 100%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving 0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations 0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, essay exams, short answer

Exams 0 - 70%

Other: Includes any assessment tools that do not logically fit into the above categories.

Participation (up to 10%); Creative project (up to 10%)

Other Category 0 - 20%
