COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Expand their knowledge base in a chosen area of civil engineering, surveying or geospatial technology through independent study and research.

Objectives:

In order to achieve these learning outcomes, during the course the students will:

1. Design a civil engineering, surveying or geospatial technology-related independent study project.
2. Perform research, analysis, problem solving, field and office work relevant to the project.
3. Present the results of the study in written, visual and/or oral format.

Topics and Scope:

Topics, scope and sequence will depend on the specific subject material to be presented.

Assignment:

Specific project will be arranged by agreement of both student and instructor involving a project with written deliverables, oral presentations, and/or field work.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Project with written deliverables

Writing 1 - 100%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving
0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

None

Exams
0 - 0%

Other: Includes any assessment tools that do not logically fit into the above categories.

Project with oral presentation or fieldwork

Other Category
0 - 99%
