COURSE CONTENT

Outcomes and Objectives:

Upon completion of the course, students will be able to:

1. Discuss the importance of the relationship of mechanism of injury to potential traumatic injuries.
2. Develop a systematic approach to scene size up and control.
3. Integrate knowledge of anatomy, physiology and pathophysiology to the patient who has sustained a traumatic injury.
4. Outline steps in trauma assessment and management.
5. Given a trauma scenario demonstrate rapid assessment and management of the injured patient.
6. Discuss rescue awareness and operations.
7. Describe and discuss incident command management and the role of the medical officer.
8. Explain the role of the paramedic at the hazardous material incident.
9. Discuss unique characteristics and challenges in caring for patients with special circumstances.
10. Review paramedic knowledge and skills necessary to function in a pre-hospital environment.

Topics and Scope:

- I. Scene Size-Up
 - A. Mechanism of injury
 - B. Scene safety
- II. ITLS Trauma Assessment
 - A. Initial survey

- B. Rapid survey
- C. Focused exam
- D. Ongoing exam
- III. ITLS Management Skills
 - A. Airway management
 - B. Needle thoracostomy
 - C. Vascular access
- IV. Traumatic Injuries
 - A. Head and neck
 - B. Thorax
 - C. Abdominal
 - D. Musculoskeletal
 - 1. extremity
 - 2. burns
- V. Special Circumstances
 - A. Pediatrics
 - B. Elderly
 - C. Drug and alcohol
 - D. Trauma arrest
- VI. Medical Incident Management
 - A. Incident Command System (ICS)
 - B. Multiple Casualty Incidents (MCI)
 - C. Terrorist attacks
- VII. Hazardous Materials Incidents
 - A. Size up and scene safety
 - B. Toxicology and contamination review
 - C. Decontamination and protective equipment
 - D. Terrorist attacks
- VIII. Rescue Awareness and Operations
- IX. Review of Didactic Knowledge and Skills

Assignment:

1. Reading 50-80 pages per week
2. Memorization of 5-10 trauma treatment protocols
3. Review 40-50 drug monographs
4. Demonstration of 3-10 trauma skills
5. Review 30-40 medical skills
6. Review content material of EMC130A, 130B, 130C
7. 2-5 quizzes
8. 5-10 trauma and medical group scenarios
9. ITLS written and skills test
10. One summative written and skills performance examination
11. Title 22 mandated attendance

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Trauma group scenarios demonstrating team leadership

Problem solving
5 - 10%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Skill performance exams including trauma and medical management

Skill Demonstrations
40 - 50%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes, summative written performance exam, and ITLS written and skills test

Exams
40 - 50%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation

Other Category
5 - 10%
