COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Apply the principle of comparative advantage to international trade between nations to determine if the nations are mutually benefiting, and determine profits.
2. Articulate the difference between the International Monetary Fund, World Bank and World Trade Organization.
3. Evaluate different exchange rate systems including fixed, flexible, and floating.

Objectives:

Students will be able to:

1. Distinguish between and use vocabulary terms related to global economic studies.
2. Critique global economic problems and discuss issues using economic principles to explain their reasoning.
3. Analyze global economic issues.
4. Demonstrate reading, communication and analytical skill levels in discussions, on exams, and within the content of assigned papers.
5. Critically evaluate the world's economic performance and explain the efficacy of economic policies directed toward the achievement of global

development.
