COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Use Access to create and process data in a database.
2. Analyze and query data to generate meaningful reports.
3. Demonstrate ability to create, maintain, update and format a table design.

Objectives:

At the conclusion of this course, the student should be able to:

1. Explain basic database concepts and terminology
2. Assess the purpose and appearance of data objects
3. Demonstrate ability to manipulate data files
4. Create databases and add, edit, modify, and delete records
5. Select appropriate table structures, modify, and enhance views
6. Create queries and reports to display specific results
7. Originate queries on multiple tables and analyze information

Topics and Scope:

I. Using a Database

- A. A database that satisfies a collection of requirements
- B. Access window features
- C. Creating a database
- D. Creating a table and adding records
- E. Custom reports
- F. Split forms
- G. Access HELP as a resource
- H. Data objects

II. Querying a Database

- A. Creating queries using the simple query wizard
- B. Creating queries using design view

- C. Text and numeric data in criteria
 - D. Saving a query and using the saved query
 - E. Sorting data and joining tables in queries
 - F. Creating a report from a query
 - G. Calculating statistics in queries
 - H. Compound criteria in queries
 - I. Query reports
 - J. Table relationship
- III. Maintaining a Database
- A. Adding, changing, and deleting records
 - B. Search and filter records
 - C. Updating a table design
 - D. Formatting a datasheet
 - E. Action queries to update records
 - F. Single-valued and multi-valued Lookup fields
 - G. Sorting records

Assignment:

1. Reading of approximately 20 pages per week in textbook
2. Completion of exercises and drills
3. Final project uploaded online to demonstrate skills presented in class
4. Quizzes or tests (2 - 8)

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Exercises and drills

Problem solving
20 - 50%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Final project, exercises and drills

Skill Demonstrations
40 - 50%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes or tests

Exams
5 - 20%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation

Other Category 0 - 10%
