COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Analyze and compare the roles, responsibilities and characteristics of Community Health Workers in the U.S. and resources to support the CHW profession.
2. Identify the social determinants of health in the U.S., California and Sonoma County and discuss the role of CHWs in addressing the root causes.
3. Discuss public health's emphasis on population based prevention, the ecological model of health and the value of epidemiology to analyze health data.

Objectives:

Upon completion of this course, the students will be able to:

1. Analyze and compare roles, characteristics and responsibilities of Community Health Workers (CHWs) internationally and in the United States.
2. Identify where CHW's work, the populations they work with, and the health issues they address.
3. Discuss the core skills necessary to become an effective CHW.
4. Identify personal qualities and values that are common among successful CHWs.
5. Describe Santa Rosa Junior College program options.
6. Discuss the evolution of the CHW field in the United States.
7. Define health and public health and explain how the field of public health is different from the field of medicine.
8. Identify and discuss the role of CHWs in preventing health inequalities and promoting health justice.
