**Catalog Description:**

This course focuses on the animation of three-dimensional (3D) digital characters using Autodesk 3ds Max software. Through both pantomime and facial lip-sync animation, students apply the fundamental mechanics of motion to create believable movements and expressive performances.

**Prerequisites/Corequisites:**

Course Completion of APTECH 43

### **Certificate/Major Applicable:**

Both Certificate and Major Applicable

## **COURSE CONTENT**

### **Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

1. Use 3ds Max software to create realistic and expressive animated performances with 3D characters.
2. Develop and apply effective animation production workflows.

### **Objectives:**

At the conclusion of this course, the student should be able to:

1. Develop animation concepts and planning documents.
2. Apply production schedules and adhere to deadlines.
3. Render animations in specific digital formats.
4. Compile audio and video tracks into final output formats.
5. Participate in class critiques of student work.

### **Topics and Scope:**

- I. Project Development and File Management
  - A. Project design and organization - Production scheduling
  - B. Story structure
  - C. Storyboards
  - D. Reference footage
  - E. Selecting and/or recording dialogue
- II. Assets
  - A. Rig library overview
  - B. Rig limitations and workarounds
  - C. Props
- III. Principles of Character Animation
  - A. Basic mechanics of motion

- B. Newton's Laws of Motion
- C. Twelve Principles of animation
  - 1. Squash and stretch
  - 2. Anticipation
  - 3. Staging
  - 4. Secondary action
  - 5. Line of action (solid drawing)
  - 6. Arcs, posing and silhouettes
  - 7. Exaggeration
  - 8. Overlapping action and follow-through
  - 9. Timing versus spacing
  - 10. Pose-to-pose versus straight-ahead animation
  - 11. Appeal
  - 12. Slow in and out
- D. Pantomime and non-verbal acting
- IV. Character Animation Techniques
  - A. Keyframe basics
    - 1. Auto key versus set key
    - 2. The Dope Sheet and Graph Editor
  - B. Using reference footage
  - C. Blocking and polishing passes
    - 1. Expression and mood changes
    - 2. Breakdown poses
    - 3. Finishing touches
  - D. Simple animation tests: weight and force
  - E. Lip-syncing
    - 1. Phonemes
    - 2. Visemes
  - F. Using props and constraint systems
  - G. Transferring animation between scenes
- V. Rendering Techniques
  - A. Efficient rendering
  - B. Distributed rendering
- VI. Editing and Compiling Techniques
  - A. Editing basics
  - B. Using image sequences
  - C. Working with audio tracks
  - D. Final output
- VII. Critiquing
  - A. Clear and concise actionable notes
  - B. Courtesy and respect

The above topics and scope apply to both lecture and lab course components in an integrated format.

### **Assignment:**

Lecture Related Assignments:

- 1. Quizzes (2-3)

Lecture and Lab Related Assignments:

- 1. Short scripts and storyboards (2-3)

2. Production schedules for short animations (2-3)
3. Video reference for short animations (2-3)
4. Pantomime animations (1-2)
5. Lip-sync animations (1-2)
6. Final character animation project

### Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Scripts

Writing  
5 - 10%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Production schedules, reference and animation exercises and projects

Problem solving  
35 - 50%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Storyboards

Skill Demonstrations  
5 - 20%

**Exams:** All forms of formal testing, other than skill performance exams.

Quizzes

Exams  
10 - 15%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Final Project

Other Category  
10 - 20%
