COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Describe pediatric and adult dental health, anatomy, physiology and dental terminology.
2. Identify evidence-based dental disease prevention and treatment strategies for children and adults.

Objectives:

1. Identify pediatric and adult oral anatomy and disease physiology, prevention and treatment.
2. Describe and demonstrate effective delivery of age-appropriate patient education topics.
3. Demonstrate effective patient counseling skills including motivational interviewing, strength-based health behavior planning and conflict resolution.
4. Explain the role of the Community Dental Health Worker and key tasks in dental disease prevention, outreach, education, disease management and referrals.
5. Describe Health Insurance Portability & Accountability Act (HIPAA), the Community Health Worker Code of Ethics and Mandated Reporter law.

Topics and Scope:

I. Dental Disease-Prevention and Management

- A. Dental health - anatomy, physiology, disease prevention, diagnosis, caries risk assessment
- B. Patient education topics - prevention, diagnosis, treatment, hygiene techniques, age-appropriate interventions, referrals

II. Patient Counseling for Families of Pediatric Dental Patients

- A. Community Health Worker Code of Ethics

- B. Mandated Reporting Law
 - C. Cultural competency
 - D. Chronic disease management
 - E. Behavior counseling
 - F. Motivational interviewing
 - G. Conflict resolution
 - H. Developmental milestones related to dental hygiene and behavior
 - I. Home visits
- III. Administrative
- A. Sonoma County Dental Health Systems
 - B. Dental Insurance for vulnerable populations - eligibility and benefits for pediatric patients
 - C. HIPAA requirements
 - D. Electronic dental records
 - E. Supervision and support

Assignment:

1. Write a dental health education plan for each of the following patients, minimum 250 words for each plan.
 - A. parent of toddler with incipient caries
 - B. 25 year old who smokes tobacco
 - C. 62 year old with diabetes II
2. Based on a scenario presented in class, develop a detailed behavior change plan to address a patient's self-selected goals. Include goals, timeline and follow-up activities (minimum 750 words)
3. In small groups perform 2-3 role-plays to demonstrate motivational interviewing skills in response to instructor-written scenarios
4. Final exam

Methods of Evaluation/Basis of Grade:
