COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Demonstrate safety procedures when handling the robot.
2. Program a set of movements on the teach pendant.
3. Simulate robot movement in the 3D simulation software.

Objectives:

During this course students will:

1. Move a robot in joint and world modes in real time.
2. Create and change teach pendant programs.
3. Modify a program.
4. Abort, access, test and run programs.
5. Add an end-of-arm tool.
6. Move a robot in 3D simulation software.

Topics and Scope:

- I. Robot System
 - A. Major/Minor axes
 - B. Joints and links
- II. Robot Operations
 - A. Safety
 1. Programming safety precautions
 2. Mechanical safety precautions
 - B. Teach Pendant
 1. Function menu
 2. Status indicators
 3. Moving a robot in joint and world modes
 4. Create and change teach pendant programs
 5. Abort, access, test and run programs

III. Handling Tool Operation & Programming

A. Frames

1. Cartesian coordinate system
2. World, tool, user and jog frames

B. Input/Output (I/O)

1. I/O signals
2. Configure I/O
3. Controller I/O

C. Program instruction

1. Motion programs
2. Motion instructions

D. Modify a program

E. Macro commands

F. Robot setup for production

G. File management

IV. Roboguide-HandlingPRO

A. Move a robot in 3D

B. Adjust the display

C. View multiple windows

D. Edit robot properties

E. Add a part and define the part in a cell

F. Add an end-of-arm tooling

G. Defining a relationship between tool and part

H. Create two fixtures for pick and placement

I. Create/run a program

J. Create an AVI file of the workcell

K. Calibrating the virtual workcell to the real cell

L. Add another robot to the workcell

M. Set the I/O to avoid robot collision

Assignment:

Lecture-Related Assignments:

1. Reading (10-30 pages per week)
2. Homework assignments (4-8)
3. Quizzes (2-6) and final exam

Lab-Related Assignments:

1. Laboratory assignments (5-12)
2. Program documentation (4-8)

Typical Laboratory Assignments:

1. Moving a robot in joint and world modes
2. Create and change teach pendant programs
3. Abort, access, test and run programs
4. Use teach pendant to draw a circle
5. Use teach pendant to write a name
6. Move a robot in 3D simulation software
7. Add a part and define the part in a cell
8. Create an AVI file of the 3D workcell

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Program documentation

Writing
20 - 50%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework assignments

Problem solving
20 - 30%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Laboratory assignments including demonstration of robot operation

Skill Demonstrations
10 - 30%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes and final exam

Exams
20 - 40%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%

Representative Textbooks and Materials:

Instructor prepared materials
