COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Analyze and respond to reading selections encountered in health science certificate and associate degree programs and their prerequisite courses.
2. Employ grammar, writing, speaking, and listening skills to effectively communicate with health care professionals, patients, and their families in a given healthcare setting.
3. Apply vocabulary, medical terminology, and culturally appropriate language to communicate in the healthcare industry.

Objectives:

Upon completion of this course, students will be able to:

1. Read and comprehend health and medical-related articles and essays.
2. Summarize reading selections.
3. Use critical thinking and inference to discuss implications of a topic to the medical and health community and patients.
4. Demonstrate use of advanced grammar structures to generate questions for information gathering and make statements for explaining procedures to healthcare professionals and patients.
5. Write on a given topic using appropriate grammar structures.
6. Use contextual clues to determine meaning of vocabulary words.
7. Utilize affixes and roots to determine meaning of medical terminology.
8. Demonstrate appropriate oral communication skills in health care settings.

Topics and Scope:

I. Reading Skills

- A. Pre-reading skills to survey and predict content
- B. Main ideas and supporting details
- C. Organizational patterns, rhetorical forms, outlining
- D. Inferencing skills

- E. Summarizing and paraphrasing
- II. Grammar and Writing Skills
 - A. Yes/no and WH-questions (Who, What, When, Where, Why and How)
 - B. Compound and complex sentences
 - C. Verb tense review
 - D. Advanced grammar structure review (adjective clause, passive voice, noun clause, modal, imperative)
 - E. Paragraph writing for summaries, personal responses, and case studies
- III. Oral Skills
 - A. Pronunciation related to medical terminology
 - B. Appropriate use of language
 - C. Sensitivity to audience in healthcare settings, including appropriate register
- IV. Medical Terminology and Vocabulary
 - A. Frequently occurring healthcare vocabulary words
 - B. Prefixes, word roots/stems, suffixes

Assignment:

The following represent the types of assignments that may be included:

1. Identification of main ideas in a reading
2. Comprehension exercises from readings
3. Summary of a reading in writing or in small group presentation
4. Development of written and oral personal responses to medical scenarios
5. Compilation of case studies
6. Develop reading outlines
7. Development of questions to ask a professional in a chosen health field
8. Work-related role-playing
9. Partner work and small group activities
10. Written vocabulary exercises with use of a medical dictionary
11. Vocabulary skill building using affixes, word root, and suffix knowledge
12. Matching vocabulary with anatomy pictures and diagrams
13. Practice of pronunciation, including stress, intonation, and rhythm patterns
14. Oral presentation on a research topic
15. Objective exams (3 - 6), Quizzes (4 - 10), and final exam
