COURSE CONTENT

Student Learning Outcomes:

Upon completion of the course, students will be able to:

1. Define OSHA and explain its function and roles.
2. Identify, minimize, and control workplace hazards by applying OSHA standards.

Objectives:

During the course, students will:

1. Locate and utilize the publication that contains OSHA standards.
2. Summarize employer and employee rights and responsibilities required by OSHA standards.
3. Describe the ways bloodborne pathogen exposure commonly occurs, key aspects of a Bloodborne Pathogen Exposure Control Plan, and steps to take if exposed.
4. Describe the main electrical hazards that may be encountered at a workplace and discuss methods of protection.
5. Identify requirements essential to providing a safe means of escape from fire and similar emergencies.
6. Describe requirements for fire detection and suppression equipment.
7. Explain how to properly handle, store and use flammable and combustible liquids with a flash point below 200° F.
8. Identify hazards that are lessened or eliminated by using the appropriate personal protective equipment (PPE).
9. Explain components of an appropriate Hazard Communication (HazCom) program.
10. Identify key pieces of information found on each Material Safety Data Sheet (MSDS).

11. Discuss the benefits and elements of an effective safety and health program.
12. Describe the main causes of machine accidents and the requirements for safeguards.
13. Describe requirements to consider in order to avoid walking/working surface hazards related to floors, walls, holes, stairways, platforms, ladders, and scaffolding.

Topics and Scope:

I. Introduction to OSHA

- A. Standards
- B. Requirements
- C. Recordkeeping and reporting
- D. Worker's rights and responsibilities
- E. Employer's rights and responsibilities
- F. Workplace inspections
- G. Sources of assistance for information, standards, consultation and emergencies
- H. OSHA website information and resources

II. Bloodborne Pathogens

- A. Common bloodborne pathogen exposures
- B. Workers who are at risk
- C. Exposure control plan
- D. Universal precautions
- E. Engineering and work practice controls
- F. Personal protective equipment
- G. Housekeeping standards
- H. Regulated waste
- I. Laundry handling
- J. Hepatitis B vaccination requirements
- K. What to do if an exposure occurs
- L. Biohazard warning labels
- M. Medical recordkeeping requirements

III. Electrical

- A. Electrical terminology
- B. Electrical shock, electrical burns, and falls
- C. Hazards
- D. Protective measures

IV. Safe Means of Escape

- A. Exit routes
- B. Emergency action plans
- C. Fire prevention plan
- D. Fire protection

V. Flammable and Combustible Liquids

- A. Primary hazards
- B. Classes
- C. Safe handling and storage

VI. Personal Protective Equipment (PPE)

- A. Protecting employees from workplace hazards
- B. Engineering controls
- C. Work practice controls
- D. Hazard assessment
- E. PPE examples for eye protection, hearing protection, foot and hand protection, face protection, and body protection
- F. Establishing a PPE program

VII. Hazard Communication (HazCom)

- A. Purpose of OSHA’s hazard communication standard
- B. Employer responsibilities
- C. HazCom program requirements
- D. Material Safety Data Sheets

VIII. Safety and Health Programs

- A. Benefits
- B. Major elements of effective programs
- C. Management commitment and employee involvement
- D. Policy and goals

IX. Machine Guarding

- A. Main causes of machine accidents
- B. Requirements for safeguards
- C. Types of machine guards
- D. Situations that warrant machine guarding

X. Walking/Working Surfaces

- A. Terminology
- B. General requirements for hazard avoidance
- C. OSHA standards

Assignment:

1. Reading assignment (approximately 200 pages total)
2. Case studies assignments (3-7)
3. Quizzes (5-10)
4. Final exam

*Minimum 70% grade is required on final exam to be eligible to receive the OSHA 10-Hour Construction Industry Outreach Department of Labor (DOL) course completion card

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Case studies assignments

Problem solving
10 - 20%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes, final exam

Exams
80 - 90%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
