COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Describe anatomical and physiological principles as related to upper extremity injuries.
2. Comprehensively evaluate, treat and rehabilitate injuries to the upper extremities.
3. Utilize evidence-based practice principles to the study of upper body injuries.

Objectives:

Upon completion of this course, students will be able to:

1. Perform general orthopedic evaluations on upper extremity injuries.
2. Develop and implement treatment plans for injuries to the upper extremities.
3. Develop, modify and implement rehabilitation programs for injuries to the upper extremities.
4. Define evidence-based practice principles and apply to upper body injury evaluation and treatment.

Topics and Scope:

- I. Definition of the Upper Extremities
 - A. Forearm
 - B. Wrist
 - C. Hand
 - D. Elbow
 - E. Shoulder
 - F. Head
 - G. Neck
 - H. Face
 - I. Spine
- II. Evaluation of Upper Extremity Injuries
 - A. History
 1. Past history

- 2. Present history
- B. Inspection/Observation
 - 1. Swelling
 - 2. Discoloration
 - 3. Deformity
- C. Palpation
 - 1. Bony
 - 2. Soft tissue
- D. Special/Functional Tests
 - 1. Stress tests
 - 2. Special tests
 - 3. Neurological tests
 - 4. Circulatory examination
- III. Treatment of Upper Extremity Injuries
 - A. First Aid
 - B. Modalities
 - 1. Infrared modalities
 - 2. Electrical stimulation
 - 3. Ultrasound
 - 4. Massage
 - 5. Traction
 - 6. Hydrotherapy
 - 7. Cryotherapy
 - 8. Heat therapy
- IV. Four Phases of Rehabilitation for Upper Extremity Injuries
- V. Medical Terminology of the Upper Extremities

All topics are covered in the lecture and lab portions of the course.

Assignment:

Lecture-related Assignments:

- 1. Textbook reading (40-60 pages per week)
- 2. Quizzes (1-3)
- 3. Written examinations (2-5)
- 4. Practical/Performance exams (2-5)
- 5. Memorization of Upper Extremity Clinical Evaluations (3 hours per week)
- 6. Evidence-based research project (7-10 pages)
- 7. Practicing lab modalities and rehabilitation techniques outside of class (1-3 hours per week)

Lab-related Assignments:

- 1. Participation in class discussion and lab practice

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Research project

Writing 10 - 20%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving
0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances, Performance exams

Skill Demonstrations
20 - 40%

Exams: All forms of formal testing, other than skill performance exams.

Written examinations, Quizzes

Exams
20 - 40%

Other: Includes any assessment tools that do not logically fit into the above categories.

Participation in class discussions and lab practice

Other Category
10 - 20%
