COURSE CONTENT

Outcomes and Objectives:
1. Describe how a US&R team functions within the California US&R system.
2. Identify the safety and medical considerations associated with US&R activities.
3. Describe the planning and preparation necessary to conduct US&R operations.
4. Demonstrate the ability to deploy the appropriate anchors, knots and packaging techniques when conducting rope rescue operations.
5. Demonstrate the ability to safely stabilize, raise, move and lower multiple heavy objects.
6. Describe the procedures used to safely perform breaking and breaching of wall assemblies.
7. Describe the components and operational functions of ladder rescue systems.
8. Describe the skills and techniques used to safely shore and operate around compromised structures.

Topics and Scope:

1. The California US&R System
2. Rescue Operations
3. US&R Safety and Medical Care for Victims
4. US&R Planning and Preparation
5. Rope Systems
   a. Rescue knots and hitches
   b. Anchor systems
   c. Rescuer and ambulatory victim packaging
   d. System attachments and fall restraint
   e. Belay and safety line systems
   f. Rappelling and descending
   g. Lower and raise man line systems and vertical lower raise systems
6. Lifting and Moving Heavy Objects
7. Breaking and Breaching
8. Ladder Rescue Systems

9. Emergency Building Shores
   a. Types of structure shoring systems
   b. Basic tools and equipment
   c. Class I timber shore
   d. Class II vertical shore
   e. Horizontal shores
   f. Pre-constructed window and door shores
   g. Sloped surface shore with cribbing
   h. Split sole raker shore system
   i. Cutting stations
10. Rope Rescue Scene Management

Assignment:

1. Scene management exercise
2. Reading 10-20 pages between sessions
3. 8-10 manipulative based scenarios
4. Completion of skills worksheets (8-10)
5. 3-5 quizzes

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because skill demonstrations are more appropriate for this course.	Writing 0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Command and decision-based scenarios	Problem solving 5 - 10%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Performance based manipulative scenarios	Skill Demonstrations 40 - 50%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice quizzes	Exams 20 - 30%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation	Other Category 10 - 20%
