

**ANSCI 20 Course Outline as of Fall 2019****CATALOG INFORMATION**

Dept and Nbr: ANSCI 20 Title: BASIC ANIMAL SCIENCE

Full Title: Basic Animal Science

Last Reviewed: 11/27/2017

Units	Course Hours per Week		Nbr of Weeks		Course Hours Total	
Maximum	3.00	Lecture Scheduled	3.00	17.5	Lecture Scheduled	52.50
Minimum	3.00	Lab Scheduled	0	6	Lab Scheduled	0
		Contact DHR	0		Contact DHR	0
		Contact Total	3.00		Contact Total	52.50
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 105.00

Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: AG 20

**Catalog Description:**

A scientific approach to the livestock industry encompassing aspects of animal anatomy, physiology, nutrition, genetics and epidemiology. Emphasis on the origin, characteristics, adaptation and contributions of farm animals to the agriculture industry. Analysis of economic trends and career opportunities in animal agriculture and a survey of the supply of animal products and their uses.

**Prerequisites/Corequisites:****Recommended Preparation:**

Eligibility for ENGL 1A or equivalent

**Limits on Enrollment:****Schedule of Classes Information:**

Description: A scientific approach to the livestock industry encompassing aspects of animal anatomy, physiology, nutrition, genetics and epidemiology. Emphasis on the origin, characteristics, adaptation and contributions of farm animals to the agriculture industry. Analysis of economic trends and career opportunities in animal agriculture and a survey of the supply of

animal products and their uses. (Grade Only)

Prerequisites/Corequisites:

Recommended: Eligibility for ENGL 1A or equivalent

Limits on Enrollment:

Transfer Credit: CSU;UC.

Repeatability: Two Repeats if Grade was D, F, NC, or NP

### **CID:**

### **Certificate/Major Applicable:**

Both Certificate and Major Applicable

## **COURSE CONTENT**

### **Student Learning Outcomes:**

Upon completion of the course, students will be able to:

1. Identify economic trends in the livestock industry.
2. Compare management practices across livestock species.
3. Utilize the scientific method to collect data and make scientific decisions relevant to animal science.

### **Objectives:**

Upon successful completion of this course, the student will be able to:

1. Identify animal contributions to human needs and development of human civilizations.
2. List economically significant beef cattle, sheep, and swine breeds and areas of production.
3. Describe the function of the major body systems and how it relates to production.
4. Identify life cycles and biotechnological principles of animal production.
5. Analyze genetic change through artificial or natural selection.
6. Summarize basic nutritional needs and feeding practices for scientific livestock production.
7. Outline marketing strategies and determine market classification of livestock.
8. Analyze animal behavior as it relates to health and performance.
9. Discuss issues affecting consumer awareness of animal welfare, food safety and the environment.
10. Collect and calculate data used to ensure scientifically-based management decisions.
11. Identify career opportunities and requirements for successful employment.

### **Topics and Scope:**

#### I. Introduction to Animal Agriculture

- A. Importance of livestock to the World and United States

- B. Economic importance to agriculture
  - C. Animal contribution to human civilization
  - D. Industry issues and challenges
  - E. Ethnic and cultural considerations to animal domestication
- II. Careers and Career Preparation in the Animal Sciences
- A. Career preparation
  - B. Employment opportunities in animal production and management in the United States
  - C. Employment opportunities in international agriculture
  - D. Future career opportunities in the United States
- III. Overview of the Livestock Industry
- A. The beef cattle and dairy industry
  - B. The swine industry
  - C. The sheep and wool industry
  - D. The poultry industry
  - E. The horse industry
- IV. Animal Production
- A. Evaluate carcass composition in comparison to the live animal
  - B. Understanding carcass and performance data
  - C. Data used for management decisions
  - D. Food products and processing
  - E. Marketing classification
  - F. Trends and future outlook
- V. Reproduction
- A. Reproductive organs and their functions
  - B. Animal breeding
  - C. Reproductive management and technology
  - D. Fertility assessment
- VI. Anatomy and Physiology
- A. Identification of external anatomy for livestock and poultry species
  - B. Analysis of body systems: reproductive and digestive
- VII. Genetics
- A. Introduction and review of genetic principles
  - B. Inheritance and population genetics
  - C. Fertilization
  - D. Gene modification and interactions
  - E. Genetic improvement and variation in the livestock industry
- VIII. Nutrition
- A. Classes of nutrients
  - B. Feeds and feed composition
  - C. Livestock feeding management practices
  - D. Growth and development for production livestock
- IX. Animal Health
- A. Biosecurity
  - B. Major diseases of farm animals
  - C. Detecting unhealthy animals
  - D. Treatment and care
- X. Animal Behavior
- A. Introduction to ethology
  - B. Behavioral characteristics
  - C. Animal handling and safety
- XI. The Scientific Method
- A. Research in animal agriculture

- B. Developing a research model
- XII. Issues Affecting the Animal Industry
  - A. Animal welfare
  - B. Economics
  - C. Advances in biotechnology
  - D. Government and environmental concerns
  - E. Food safety and consumer awareness

**Assignment:**

1. Reading assignments average minimum 30 pages per week
2. Writing assignments: reports, worksheets, and written essay exams
3. Quizzes (10 - 15), midterm and final
4. Term paper of 5 to 7 pages

**Methods of Evaluation/Basis of Grade:**

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, reports, term paper	Writing 30 - 40%
---------------------------------------	---------------------

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, worksheets	Problem solving 10 - 20%
-------------------------------	-----------------------------

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None	Skill Demonstrations 0 - 0%
------	--------------------------------

**Exams:** All forms of formal testing, other than skill performance exams.

Quizzes, midterm and final; multiple choice, true/false, matching items, completion, and essay questions	Exams 40 - 60%
--	-------------------

**Other:** Includes any assessment tools that do not logically fit into the above categories.

None	Other Category 0 - 0%
------	--------------------------

**Representative Textbooks and Materials:**

- Introduction to Animal Science: Global, Biological, Social and Industry Perspectives. 6th ed. Damron, Stephen. Pearson. 2017
- Animal Science and Industry. 8th ed. Cunningham, Merle and Acker, Duane and LaTour, Mickey. Pearson. 2017

Modern Livestock and Poultry Production. 9th ed. Flanders, Frank and Gillespie, James.  
Cengage. 2016

Scientific Farm Animal Production. 11th ed. Taylor, Robert and Field, Thomas. Pearson. 2015
