**COURSE CONTENT**

**Student Learning Outcomes:**

- Upon completion of the course, students will be able to:
1. Identify, construct, and utilize the fundamental elements of music including rhythm, scales, modes, intervals, chords, and chord progressions.
  2. Perform elementary harmonic, melodic, and structural analysis of music in various styles.

**Objectives:**

- The student will be able to:
1. Explain the four basic properties of sound: pitch, duration, intensity (dynamics), and timbre (overtones).
  2. Read and write musical notation on all clefs (G, F, and C).
  3. Identify, interpret, and utilize all meter signatures in simple, compound, and irregular meters.
  4. Identify, construct, and utilize key signatures and the Circle of Fifths.
  5. Identify and construct all diatonic major and minor scales and the church modes.
  6. Identify and construct synthetic and non-diatonic scales including whole-tone, pentatonic, diminished/octatonic, chromatic, and non-Western scales.
  7. Identify and construct all simple and compound intervals.
  8. Transpose music from one key to another.
  9. Identify and construct triad chords (major, minor, augmented, and diminished) in root position and inversion in all keys.
  10. Identify and construct dominant seventh chords in all keys.
  11. Analyze and construct chord progressions in Roman numerals and figured bass in all keys.
  12. Analyze a diverse body of songs and compositions in a variety of styles with attention to

key, phrase and cadence structure, rhythmic motives, and melodic design.

## **Topics and Scope:**

### **I. Music for Study and Analysis**

Although the emphasis of this course is on the Euro-American Western tradition, musical examples will be drawn from a wide variety of folk, "art", and popular music reflecting a diversity of cultures (both Western and non-Western) and the contributions of all musicians including women and minorities. Includes a discussion of aesthetics and the role that music plays in society.
