		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 70.00

Total Student Learning Hours: 105.00

Title 5 Category:	AA Degree Applicable
Grading:	Grade Only
Repeatability:	21 - Legally Mandated Repetition
Also Listed As:	
Formerly:	EMC 275.1

Catalog Description:

Application of basic principles of cardiac anatomy and physiology to recognize basic heart arrhythmias. Designed for health and allied care personnel who assume responsibility for cardiac monitoring in the pre-hospital and hospital setting.

Prerequisites/Corequisites:

Recommended Preparation: Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:

Schedule of Classes Information:

Description: Application of basic principles of cardiac anatomy and physiology to recognize basic heart arrhythmias. Designed for health and allied care personnel who assume responsibility for cardiac monitoring in the pre-hospital and hospital setting. (Grade Only) Prerequisites/Corequisites: Recommended: Eligibility for ENGL 100 or ESL 100 Limits on Enrollment:

Both Certificate and Major Applicable

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Identify a normal electrocardiogram
- 2. Identify common abnormal cardiac rhythms

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Identify and define 9 structures of the heart and their basic function.
- 2. Define the following terms related to cardiac electrophysiology:
 - A. Depolarization
 - B. Repolarization
 - C. Action potential
 - D. Refractory states
- 3. Describe the sequence of cardiac activation and recovery, and relate this information to the electrocardiogram (EKG) configuration.
- 4. Demonstrate a systematic method of EKG interpretation.
- 5. Identify normal waveforms for monitoring leads II, modified cardiac lead (MCL) 1 and 6.
- 6. Classify arrhythmias according to site, mechanism and severity.
- 7. Identify 15 arrhythmias.
- 8. Recognize and describe 4 conduction defects.
- 9. Identify 3 premature and escape beats and state the mechanism for each.
- 10. Discuss possible nursing and medical interventions for 15 major arrhythmias.
- 11. Identify pacemaker rhythms.

Topics and Scope:

- I. Overview
 - A. Cardiac anatomy and physiology
 - B. Myocardial blood supply
 - C. Cardiac conduction system
- II. EKG Interpretation
 - A. Vectors, lead placements
 - B. Waves and measurements
 - C. Analysis of EKG rhythm strips
 - D. Modified cardiac leans
- III. Conduction System
 - A. Anatomy
 - B. EKG analysis
 - C. Sinus rhythms
- IV. Cardiac Rhythms
 - A. Atrial
 - B. Junctional
 - C. Ventricular
- V. Heart Blocks Conduction Defects

Assignment:

- 1. Read approximately 10 pages per week
- 2. Identify approximately 20 rhythm strips per week
- 3. Exam identifying 15 strips rhythm strips

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Identify 20 rhythm strips

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances, Performance exams

Exams: All forms of formal testing, other than skill performance exams.

Completion, Identify EKG rhythm strips

Writing 5 - 10%

Problem solving 0 - 0%

Skill Demonstrations 20 - 45%

None

Other Category 0 - 0%

Representative Textbooks and Materials:

ECG Workout: Exercises in Arrhythmia Interpretation. 7th ed. Huff, Jane. Lippincott. 2016 Instructor prepared materials.
