		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 87.50

Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: ELEC 53

Catalog Description:

Fundamentals of programmable logic controllers (PLC), including PLC types, input and output devices, and ladder logic programming.

Prerequisites/Corequisites:**Recommended Preparation:****Limits on Enrollment:****Schedule of Classes Information:**

Description: Fundamentals of programmable logic controllers (PLC), including PLC types, input and output devices, and ladder logic programming. (Grade Only)

Prerequisites/Corequisites:

Recommended:

Limits on Enrollment:

Transfer Credit:

Repeatability: Two Repeats if Grade was D, F, NC, or NP

Both Certificate and Major Applicable

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Establish electronic communication between a programmable logic controller (PLC) and a personal computer.
2. Write and document ladder logic programs for a PLC.
3. Install and test a ladder logic program for a PLC.
4. Identify and troubleshoot PLC program problems.

Objectives:

Students will be able to:

1. Design ladder logic programs and assemble documentation.
2. Modify programs using touch screens and teaching pendants.
3. Program a PLC using ladder logic and one additional PLC language.
4. Identify, troubleshoot, and repair faults in sensors and output devices.
5. Identify, troubleshoot, and resolve software problems.
6. Originate proper tag-out procedures when working on electrical equipment.
7. Interpret and apply safety procedures in a manufacturing environment.

Topics and Scope:

- I. Types of Input and Output Devices
 - A. Relay devices
 - B. Analog devices
- II. Types of Controllers
- III. Types of Software
- IV. Fundamental Operation of PLCs
 - A. Relay inputs and outputs
 - B. Analog inputs and outputs
 - C. Counters
 - D. Timers
- V. Program Control Instructions
 - A. Jump instructions

- B. Subroutines
- C. Sequencers
- VI. Electrical Tag-Out Procedures
- VII. Basic Manufacturing Safety
- VIII. Wiring
 - A. Direct current (DC) inputs
 - B. Alternating current (AC) inputs
 - C. Relay outputs
 - D. Transistor outputs
- IX. PLC Output Devices
 - A. Analog
 - B. Relay
- X. Troubleshooting Techniques
 - A. PLC
 - B. Sensors
 - C. Related software
- XI. Touchscreens and Teaching Pendants
- XII. Human-Machine Interface (HMI)
 - A. Operation
 - B. Limitations
- XIII. Laboratory Topics
 - A. Safety procedures
 - B. Allen-Bradley programming environment
 - C. PLC inputs and outputs
 - D. Numbering systems
 - E. Programming logic operations
 - F. Wiring a PLC
 - G. Troubleshooting techniques

Assignment:

Lecture-Related Assignments:

1. Reading (10-30 pages per week)
2. Homework problems:
 - Design and interpret relay logic programs (1-2)
 - Design and interpret ladder logic programs (1-4)
 - Modify ladder logic programs (1-4)
 - Assemble software documentation for programs written in two different programming languages (1-4)
3. Quizzes (3-6), midterm, and final exam

Lab-Related Assignments:

1. Laboratory assignments (5-12) including demonstrating operation of a PLC system

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Program documentation	Writing 20 - 50%
Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.	
Homework problems	Problem solving 20 - 30%
Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.	
Laboratory assignments including demonstration of PLC operation	Skill Demonstrations 10 - 30%
Exams: All forms of formal testing, other than skill performance exams.	
Quizzes, midterm and final exam	Exams 20 - 40%
Other: Includes any assessment tools that do not logically fit into the above categories.	
None	Other Category 0 - 0%

Representative Textbooks and Materials:

Programmable Logic Controllers. 5th ed. Petruzella, Frank. McGraw-Hill. 2017
