COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Operate radiographic imaging equipment.
- 2. Position patients to perform radiographic examinations and procedures.
- 3. Use minimum radiation exposure for the patient, self, and others.

Objectives:

At the conclusion of this course, students will be able to at the intermediate/advanced level:

- 1. Apply theoretical knowledge base, including physiological, pathophysiological, psychological, and social concepts, in providing care.
- 2. Analyze patient care situations and apply appropriate care processes when assessing/gathering data related to patients' physical and mental conditions.
- 3. Analyze patient care situations and apply appropriate care processes when collaborating with the radiologic technologist and physicians for imaging purposes.
- 4. Communicate effectively in interactions with the health care team and with patients and their families.
- 5. Practice within the Radiologic Technologist Scope of Practice of professional/ethical standards.
- 6. Perform basic tasks expected of a radiologic technologist as a collaborating member of a multidisciplinary health care team.
- 7. Demonstrate critical thinking behaviors in planning and implementing patient care and imaging protocols.

Topics and Scope:

I. Orientation To The Clinical Setting A. Physical environment

- B. Fire, safety, disaster protocols, emergency codes, equipment
- C. Policies and procedures
- II. Computer Systems And Programs
 - A. Digital imaging
 - B. Health information system
- III. Documentation Regarding Imaging Procedures
- IV. Health Insurance Portability And Accountability Act (HIPAA)
- V. Assignment Procedures
 - A. Room schedule
 - B. Rotation details
- VI. Preparation For Patient Care
- VII. Error Prevention
 - A. Image analysis
 - B. Critical thinking
 - C. Evaluation of image quality
- VIII. Code Of Ethics
- IX. Patient Rights
- X. Standard And Special Infection Control Procedures
- XI. Physical Assessments To Individual Patients
 - A. Current medical problems
 - B. Potential complications
- XII. Recognizing And Supporting Patients' Coping Strategies
- XIII. Management Of Imaging Procedures
 - A. Routines and protocols for procedures
 - B. Patient supervisions
 - C. Critical thinking and adaptation to patients' needs
- XIV. Radiation Protection
 - A. Patients
 - B. Self
 - C. Other
 - D. As Low As Reasonably Achievable (ALARA)
- XV. Clinical Competencies
 - A. Eleven mandatory from prescribed list
 - B. Two elective from a prescribed list
- XVI. Basic Tasks Of A Radiologic Technologist
 - A. Skill performance
 - B. Equipment use
 - C. Documentation

Assignment:

- 1. Completion of 8 bi-weekly progress reports (not graded)
- 2. Completion of (11) mandatory and (2) elective competencies
- 3. Completion of required 440 clinical hours
- 4. Successful completion of a final clinical evaluation

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Final clinical evaluation

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Clinical competencies and evaluation

Exams: All forms of formal testing, other than skill performance exams.

None

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation, completion of hours requirement

Representative Textbooks and Materials:

SRJC Clinical Competency Handbook, Current Year Edition.

Writing 0 - 0%	

Problem solving 10 - 30%

Skill Demonstrations 50 - 60%
