**Catalog Description:**

Introduction to basic concepts of computer science and fundamental techniques for solving problems using the Python programming language. This introductory programming course is suitable for both liberal arts and sciences students to further the development of critical thinking and logical reasoning through problem solving with computer programming. Students will learn to craft scripting tools, using Python programming techniques, needed for system administration, web application auditing, cybersecurity, and penetration testing. The course will help students prepare for the Python Institute's Certified Entry-Level Python Programmer Certification (PCEP) and Certified Associate in Python Programming Certification (PCAP) exams.

**Prerequisites/Corequisites:****Recommended Preparation:**

Eligibility for ENGL 1A or equivalent

**Limits on Enrollment:****Schedule of Classes Information:**

Version Term Effective:	Fall 2021	Term Inactive:	Fall 2022

## **COURSE CONTENT**

### **Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

1. Describe the principles of structured programming and be able to describe, design, implement, and test structured programs using currently accepted methodology.
2. Explain what an algorithm is and its importance in computer programming.

### **Objectives:**

Students will be able to:

1. Construct correct and efficient algorithms.
2. Describe the software-development life cycle.

3. Employ the basic elements of the Python language.
4. Implement algorithms using Python flow-control constructs.
5. Write descriptive and helpful program documentation.
6. Implement algorithms using lists.
7. Create Python scripts and programs for network management.

### **Topics and Scope:**

- I. Introduction to Python and computer programming
- II. Setting up your Python environment
- III. Data types, variables, basic input-output operations, basic operators
- IV. Boolean values, conditional execution, loops, lists and list processing, logical and bitwise operations
- V. Functions, tuples, dictionaries, and data processing
- VI. Transmission Control Protocol/Internet Protocol (TCP/IP) networks and Python networking
- VII. Modules, Packages, and Package Installer for Python (PIP)
- VIII. Strings, String and List Methods, Exceptions
- IX. Object-Oriented Programming, software-development life cycle, flow-control, and program documentation
- X. Owning the network with Scapy

All topics will be covered in the lecture and lab portions of the course.

### **Assignment:**

Reading assignments include:

1. Online research of Python programming methods
2. Approximately 30 pages per week from the curriculum

Homework problems include:

1. Weekly online discussion thread participation
2. Hands-on exercises and class performances to demonstrate proficiency with topics
3. Online quizzes (5 - 10)
4. Creation of programming assignments using the Python programming language

Other assignments include:

1. Skills demonstration examinations
2. Classroom scenario-based exercises

### **Methods of Evaluation/Basis of Grade:**

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Weekly written online discussions

Writing  
5 - 10%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, assignments for Python programming

Problem solving  
15 - 30%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performance of Python programming and skills demonstration examinations

Skill Demonstrations  
20 - 30%

**Exams:** All forms of formal testing, other than skill performance exams.

Exams, Final Exam and skill demonstration examinations

Exams  
20 - 30%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation in scenario-based exercises

Other Category  
5 - 20%

### **Representative Textbooks and Materials:**

Python for Everybody: Exploring Data in Python 3. Severance, Russell, Charles. CreateSpace Independent Publishing Platform: 2016 (Classic)

Python Programming: The Complete Crash Course for Beginners to Mastering Python with Practical Applications to Data Analysis & Analytics, Machine Learning and Data Science Projects - 4 Books in 1. Park, Andrew. Independently published; Illustrated edition: 2020

Violent Python: A Cookbook for Hackers, Forensic Analysts, Penetration Testers, and Security Engineers. O'Connor, TJ. 1st ed. Waltham, Mass: Elsevier, 2014. (Classic)

## **OTHER REQUIRED ELEMENTS**

### **STUDENT PREPARATION**

Matric Assessment Required:	E	Requires English Assessment
Prerequisites-generate description:	NP	No Prerequisite
Advisories-generate description:	A	Auto-Generated Text
Prereq-provisional:	N	NO
Prereq/coreq-registration check:	N	No Prerequisite Rules Exist
Requires instructor signature:	N	Instructor's Signature Not Required

### **BASIC INFORMATION, HOURS/UNITS & REPEATABILITY**

Method of instruction:	02	Lecture
	71	Internet-Based, Simultaneous Interaction
	72	Internet-Based, Delayed Interaction
Area department:	CS	Computer Studies
Division:	72	Arts & Humanities
Special topic course:	N	Not a Special Topic Course
Program status:	2	Not Certificate/Major Applicable
Repeatability:	00	Two Repeats if Grade was D, F, NC, or NP
Repeat group id:		

### **SCHEDULING**

Audit allowed:	Y	Auditable
Open entry/exit:	N	Not Open Entry/Open Exit
Credit by exam:	N	Credit by examination not allowed
Budget code: Program:	0000	Unrestricted
Budget code: Activity:	0701	Computer & Information Science

### **OTHER CODES**

Discipline:	Computer Science OR Computer Information Systems	
Basic skills:	N	Not a Basic Skills Course
Level below transfer:	Y	Not Applicable
CVU/CVC status:	Y	Distance Ed, Not CVU/CVC Developed
Distance Ed Approved:	Y	<a href="#">Either online or hybrid, as determined by instructor</a>
Emergency Distance Ed Approved:	N	None
Credit for Prior Learning:	N	Agency Exam
	N	CBE
	N	Industry Credentials
	N	Portfolio
Non-credit category:	Y	Not Applicable, Credit Course
Classification:	Y	Career-Technical Education
SAM classification:	C	Clearly Occupational
TOP code:	0708.00	Computer Infrastructure and Support
Work-based learning:	N	Does Not Include Work-Based Learning
DSPS course:	N	Not a DSPS Course
In-service:	N	Not an in-Service Course
