Both Certificate and Major Applicable

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Analyze and apply biological and environmental theories to explain cognitive, physical, emotional, and social development of the individual from the prenatal period through childhood and adolescence.
2. Describe and apply the research methods that are used to study child and adolescent psychology.

Objectives:

At the conclusion of this course, the student should be able to:

1. Distinguish among significant theoretical perspectives on the development of the child.
2. Differentiate between chromosomes and genes, recessive and dominant traits, and monozygotic and dizygotic twins.
3. Discuss chromosomal and genetic abnormalities relevant to the psychological maladjustment of the child.
4. Describe how psychological and environmental factors such as maternal stress, nutrition, teratogens, sexually transmitted diseases, and drugs influence the development of the child.
5. Examine the brain structures, intellectual growth, perceptual processes, memory and language development of the child in the infancy, childhood and adolescent years.
6. Explain how attachment, social deprivation, child abuse and neglect, day care, temperament, and gender differences influence the infant's social and emotional development.

7. Discuss the influence of parenting styles, siblings, peer interactions, and gender roles in the early childhood years.
8. Describe the factors that contribute to and delineate treatment strategies for childhood obesity, eating disorders, elimination disorders, ADHD, and learning disabilities.
9. Provide causal factors and treatment options for separation anxiety, conduct disorder, childhood depression, and drug abuse in the middle childhood and adolescent years.
10. Discriminate among the various theories that describe the adolescent's self-concept, emotional, cognitive and moral development.

Topics and Scope:

- I. The Study of Human Development
 - A. History
 - B. Research
 - C. Theories
- II. The Human Heritage
 - A. Genes
 - B. Environment
- III. Prenatal Development and Birth
- IV. Infant Capacities and the Process of Change
- V. The Achievement of the First Year and the End of Infancy
- VI. Early Experiences and Later Life
- VII. Language Acquisition
- VIII. Early Childhood Thought
 - A. Competence
 - B. Abilities
- IX. Social Development in Early Childhood
- X. The Contexts of Early Childhood
 - A. Family
 - B. Media
- XI. Cognitive and Biological Attainments of Middle Childhood
- XII. Schooling and Physical and Social Development in Middle Childhood
- XIII. Biological and Social Foundations of Adolescence
- XIV. Cognitive and Psychological Achievements of Adolescence
- XV. Emerging Adulthood

Assignment:

1. Read approximately 35 pages per week
2. Writing assignment that may include research, experiential, response, or project for a minimum of 1,250 words
3. Formal testing: quizzes, exams, and a final
4. Oral presentation and/or group project may be assigned

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Research, experiential, response, or project paper	Writing 30 - 60%
Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.	
None	Problem solving 0 - 0%
Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.	
None	Skill Demonstrations 0 - 0%
Exams: All forms of formal testing, other than skill performance exams.	
Quizzes, Exams, and a Final	Exams 40 - 60%
Other: Includes any assessment tools that do not logically fit into the above categories.	
Oral presentation and/or group project	Other Category 0 - 10%
