COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Analyze and apply biological and environmental theories to explain cognitive, physical, emotional, and social development of the individual from the prenatal period through childhood and adolescence.
- 2. Describe and apply the research methods that are used to study child and adolescent psychology.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Distinguish among significant theoretical perspectives on the development of the child.
- 2. Differentiate between chromosomes and genes, recessive and dominant traits, and monozygotic and dizygotic twins.
- Discuss chromosomal and genetic abnormalities relevant to the psychological maladjustment of the child.
- 4. Describe how psychological and environmental factors such as maternal stress, nutrition, teratogens, sexually transmitted diseases, and drugs influence the development of the child.
- 5. Examine the brain structures, intellectual growth, perceptual processes, memory and language development of the child in the infancy, childhood and adolescent years.
- Explain how attachment, social deprivation, child abuse and neglect, day care, temperament, and gender differences influence the infant's social and emotional development.

- 7. Discuss the influence of parenting styles, siblings, peer interactions, and gender roles in the early childhood years.
- 8. Describe the factors that contribute to and delineate treatment strategies for childhood obesity, eating disorders, elimination disorders, ADHD, and learning disabilities.
- 9. Provide causal factors and treatment options for separation anxiety, conduct disorder, childhood depression, and drug abuse in the middle childhood and adolescent years.
- 10. Discriminate among the various theories that describe the adolescent's self-concept, emotional, cognitive and moral development.

Topics and Scope:

- I. The Study of Human Development
 - A. History
 - B. Research
 - C. Theories
- II. The Human Heritage
 - A. Genes
 - B. Environment
- III. Prenatal Development and Birth
- IV. Infant Capacities and the Process of Change
- V. The Achievement of the First Year and the End of Infancy
- VI. Early Experiences and Later Life
