COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Use major psychological theoretical perspectives to explain human behavior.
2. Identify the major scientific research methods, and use the critical thinking process to assess research materials and methods.

Objectives:

At the conclusion of this course, the student should be able to:

1. Define psychology; outline its historical roots; identify what psychologists do; and apply the critical thinking process to psychological phenomena and research outcomes.
2. Describe and apply with examples the various psychological research methods used to study behavior; include description of case studies, naturalistic and laboratory observations, correlational studies, surveys and tests, the experimental method, and longitudinal and cross-sectional studies.
3. Diagram the structure of the brain and its neuron cells; include descriptions of hemispheric specialization, location of important structures and their functions, and male/female differences.
4. Discriminate among the following body rhythms and mental states: circadian rhythm and the

- sleep cycle, infradian rhythm and the premenstrual cycle, and ultradian rhythm and the stages of dream.
5. Analyze the processes of sensation and perception and relate how abilities, beliefs, and emotions can affect sensory perception.
 6. Summarize the principles of classical conditioning, operant conditioning, and social-cognitive learning and apply these principles when explaining the origins of phobias, fetishes, and aggression.
 7. Determine how societal roles and rules, authority figures, and group opinions and behaviors affect an individual's opinions, actions, and emotions; generate a plan on how to decrease stereotypes, prejudice, and discrimination.
 8. Distinguish among the different theories of intelligence, including Sternberg's Triarchic Theory of Intelligence and Gardner's Theory of Multiple Intelligence.
 9. Discuss how the body, the mind, and culture influence the experience and display of emotions; assess the components of stress and describe how to cope and manage stressful events.
 10. Compare and contrast the following theories of personalities: biological (genes and heredity), environmental (parents, peers, situations), cultural (values and traits), psychodynamic (unconscious conflicts and desires), and humanistic (present inner self).
 11. Analyze and describe the following categories of psychological disorder: anxiety disorders, mood disorders, eating disorders, personality disorders, dissociative disorders and schizophrenia.
 12. Apply the following treatment strategies and therapeutic styles to their appropriate psychological disorders: lobotomy, Electroconvulsive Therapy (ECT), antianxiety, antidepressant, antipsychotic, psychodynamic, cognitive-behavioral, behavioral, humanistic, group, and family.

Topics and Scope:

- I. Introduction to Psychological Theories
- II. Psychology Research Methods
- III. Evolution, Genes, and Behavior
- IV. Neurons, Hormones, and the Brain
- V. Body Rhythms and Mental States
- VI. Sensation and Perception
- VII. Learning and Conditioning
- VIII. Behavior in Social and Cultural Context
- IX. Thinking and Intelligence
- X. Memory
- XI. Emotion
- XII. Motivation
- XIII. Theories of Personality
- XIV. Development over the Life Span
- XV. Health, Stress, and Coping
- XVI. Psychological Disorders

Assignment:

1. Read approximately 35 pages per week
2. Writing assignment that may include research, experiential, response, or project for a minimum of 1,250 words
3. Quizzes, exams, and a final
4. Oral presentation and/or group project may be assigned

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Research, experiential, response, or project paper

Writing
30 - 60%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving
0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes, Exams, and a Final

Exams
40 - 60%

Other: Includes any assessment tools that do not logically fit into the above categories.

Oral presentation and/or group project

Other Category
0 - 10%
