### **COURSE CONTENT**

**Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

1. Utilize appropriate counseling skills and techniques to conduct a client interview and/or to facilitate discussion in an interactive group setting.
2. Perform a counseling assessment and develop a client treatment plan.
3. Identify different theories of counseling and appropriate applications for each.

**Objectives:**

At the conclusion of this course, the student should be able to:

1. Demonstrate knowledge of and apply theoretical perspectives in human development, human behavior, helping theory and an awareness of the values and behaviors of diverse cultures.
2. Apply effective communication skills and techniques in the counseling session.
3. Define the elements that constitute an effective counseling/group session including assessment, problem solving and appropriate referrals.
4. Combine information gathered during assessment into clear and concise written chart notes, both formal and informal.
5. Integrate information gathered during assessment to support clients with solutions for problem solving for health promotion and behavior change.
6. Evaluate cues that require referrals to more highly skilled professionals.

**Topics and Scope:**

I. Theoretical Perspectives

A. Foundations of Counseling
