

**HORT 72 Course Outline as of Spring 2021****CATALOG INFORMATION**

Dept and Nbr: HORT 72 Title: GREENHOUSE PRODUCTION

Full Title: Greenhouse Production

Last Reviewed: 2/11/2019

Units		Course Hours per Week		Nbr of Weeks	Course Hours Total	
Maximum	3.00	Lecture Scheduled	2.00	17.5	Lecture Scheduled	35.00
Minimum	3.00	Lab Scheduled	3.00	8	Lab Scheduled	52.50
		Contact DHR	0		Contact DHR	0
		Contact Total	5.00		Contact Total	87.50
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 70.00

Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: AG 92.3

**Catalog Description:**

Analysis, description, and operation of greenhouses and other structures and facilities as they relate to a variety of ornamental and agricultural crops. Included are: relationships of light, temperature, moisture, aeration, humidity, and fertility; identification and investigation of major greenhouse grown crops including foliage plants, flowering potted plants, bedding plants, cut flowers, color and specialty crops; creating and implementing several cropping plans for greenhouse plants and products.

**Prerequisites/Corequisites:****Recommended Preparation:**

Eligibility for ENGL 100 or ESL 100 or equivalent; and Eligibility for CS 5 or proficiency in basic productivity software including word processing, spreadsheet, and presentation software

**Limits on Enrollment:****Schedule of Classes Information:**

Both Certificate and Major Applicable

## **COURSE CONTENT**

### **Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

1. Demonstrate knowledge and skills in the growing and marketing of greenhouse products.
2. Identify and evaluate the markets for greenhouse products.
3. Propagate, grow and market greenhouse products for specific sale date.
4. Explain and apply propagation principles involved in the production of greenhouse crops.

### **Objectives:**

At the conclusion of this course, the student should be able to:

1. Outline environmental factors affecting plant growth.
2. Manipulate the growth environment for efficient use of resources and facilities.
3. Identify selected plants from the various categories of greenhouse crops.
4. Identify markets for greenhouse products and market crops grown by the class.
5. Propagate, grow and market greenhouse products for specific sale dates.
6. Discuss factors affecting plant growth.
7. Describe facilities and equipment used in growing greenhouse crops.
8. Apply propagation principles involved in the production of greenhouse crops.
9. Identify and properly utilize a variety of growing media.
10. Describe factors affecting plant fertility and demonstrate proper fertilizer application methods.
11. Discuss pests and diseases of greenhouse crops.

12. The student will demonstrate manual skill in the following areas:
- Planting seed
  - Spotting off and transplanting
  - Pest and disease control
  - Watering crops properly
  - Development of value-added products
  - Perform tests important to crop production. e.g. pH, salinity
  - Handling and applying fertilizers

### **Topics and Scope:**

- Basic Introduction to the Greenhouse Industry
- Environmental Factors Affecting Plant Growth
  - Light
  - Temperature
  - Humidity
  - Moisture
  - Air quality
  - Photoperiod
- Manipulation of Environment
  - Coldframes, hotbeds, greenhouses, shade houses, etc.
  - Glazing materials for the above
  - Heating, Cooling and ventilating growing facilities
  - Manipulating humidity, fertility, air quality and soil moisture
  - Hardening off product
- Propagation, and Production of Various Greenhouse Crops
  - Potted plants -- foliage
  - Potted plants -- flower
  - Bedding plant production
  - Specialty greenhouse crop production
- Media and Containers for Rooting, Growing and Marketing Greenhouse Crops
  - Media for vegetative and seed propagation.
  - Growing media for greenhouse crops.
  - Containers used for greenhouse crops
- Soil Fertility
  - Essential plant food elements
  - Fertilizers
  - Ways to deliver fertilizer to your plants
  - Salinity and pH: how they affect the growing media
- Pests and Diseases of Greenhouse Crops
- Greenhouse Crop Production

All Topics are covered in both lecture and lab.

### **Assignment:**

#### Lecture-Related Assignments:

- Term paper (10 - 15 page) and oral report on selected greenhouse-grown crop
- Weekly reading (5 - 10 pages)
- Complete homework problems, including calculating materials, production and labor costs for an assigned crop
- Conduct research and complete written exercise on production timelines for a greenhouse crop

as assigned  
5. Tests (2 - 3) and a final exam

#### Lab-Related Assignments:

1. Cropping plan and implementation for greenhouse plants and products
2. Four to six industry field trips with 2-page report for each summarizing production data
3. Field work, including planting, media mixing, pinching, deadheading, watering, and fertilizing

#### Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Field trip reports; term paper

Writing  
10 - 30%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Cropping plans; homework problems; written exercise on production timelines

Problem solving  
10 - 40%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Field work

Skill Demonstrations  
5 - 20%

**Exams:** All forms of formal testing, other than skill performance exams.

Tests and final exam: multiple choice, true/false, matching items, completion

Exams  
30 - 60%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Field trip participation; oral report

Other Category  
10 - 30%

#### Representative Textbooks and Materials:

Greenhouse Operation and Management. 7th ed. Nelson, Paul. Pearson. 2012 (classic)

Ball Red Book. 18th ed. Beyetes, Chris. Ball Publishing. 2011 (classic)

The Commercial Greenhouse. 3rd ed. Boodley, James and Newman, Steven. Del Mar. 2008 (classic)

A Grower's Guide to Water, Media, and Nutrition for Greenhouse Crops: A Growers Guide. Reed, David. Ball Publishing. 1996 (classic)
