COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Apply knowledge and demonstrate skills required to receive American Heart Association certification in Pediatric Advanced Life Support provider.

Objectives:

At the conclusion of this course, the student should be able to:

1. Identify symptoms of respiratory failure and shock in the infant and child.
2. Identify and demonstrate relevant pharmacology principles for pediatric resuscitation.
3. Demonstrate the airway management skills needed for the resuscitation of the pediatric patient in cardiopulmonary arrest.
4. Discuss specific resuscitative issues as they relate to the neonate.
5. Identify and demonstrate techniques to establish venous access of pediatric patient in cardiopulmonary arrest.
6. Identify common cardiac dysrhythmias and electrical intervention.
7. Discuss pediatric trauma incidents and management.

Topics and Scope:

- I. Recognition/management of Pediatric Cardio Respiratory Failure and Shock
 - A. Assessment
 - B. Intervention
- II. Pharmacology
 - A. Pharmacokinetics

- B. Pediatric resuscitative drugs
- III. Airway Management (Lab)
 - A. Basic airway skill
 - B. Advanced airway skills
- IV. Neonatal Resuscitation (Lab)
- V. Pediatric vascular access (Lab)
- VI. Pediatric Rhythm Disturbances and Defibrillation (Lab)
 - A. Cardiac rhythms
 - B. Intervention
- VII. Pediatric Trauma (Lab)
 - A. Accidental
 - B. Non-accidental

All topics are covered in the lecture and lab portions of the course.

Assignment:

Lab related assignments

1. Participate in interactive scenarios and skills stations
2. Complete performance exam
3. Multiple choice exam

Lecture related assignments

- 1 Reading assignments before attending class (8 - 12 hours)
2. Complete reading text by completion of class.

NOTE: Student must pass both performance and written exams to earn certificate and pass class.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because skill demonstrations are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Skills scenarios

Problem solving
20 - 40%
