COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Students will be able to systematically collect, analyze, and accurately record baseline data on general, oral and psychosocial status.
2. Use clinical data processing forms, and electronic records software.

Objectives:

Students will be able to:

1. Launch the appropriate program.
2. Create a new patient file.
3. Utilize data processing capabilities to complete Health Insurance Portability and Accountability Act (HIPAA) and patient consent forms.
4. Collect and input medical history data to include medical alerts, sensitivities, allergies and health status.
5. Collect and input dental charting data to include existing restorations, unsound dentition and restorations, enamel and dentin pathologies, and missing teeth.
6. Collect and input periodontal charting data to include periodontal probing depths, bleeding on probing sites, clinical attachment loss (CAL), mucogingival deformities, and mucogingival junction measurements.
7. Utilize data processing to complete documents using free-text narrative and existing templates.
8. Access an existing patient's file documents including extra and intraoral images.
9. Accurately enter, reschedule, and cancel patient on schedule using clinical forms and electronic records system.
10. Systematically collect, analyze, and accurately record baseline data on general, oral and

psychosocial health status using methods consistent with medicolegal principles.

Topics and Scope:

- I. Data Collection and Entry
 - A. New patient file
 - B. HIPAA and consent forms
 - C. Medical history
 - D. Dental chart
 - E. Periodontal chart
 - F. Route slip
- II. Data Processing
 - A. Patient referral letters
 - B. Treatment completion letters
 - C. Post-op instructions
- III. Data Retrieval
 - A. Existing patient file
 - B. Extra and intraoral images

Assignment:

- 1. Written patient data collection and entry assignments: Clinical setting (3-8)
- 2. Skill demonstrations from instructor prepared samples: (3-8)
 - a. Computerized data processing assignments
 - b. Computerized data retrieval assignments
 - c. Computerized dental charting
- 3. Readiness assessment evaluations (3-8)
- 4. Quizzes (3-8), Midterm, Final Exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written data collection and entry assignments from - clinical setting

Writing
5 - 10%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Readiness assessment evaluations from instructor prepared data entry

Problem solving
50 - 60%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Computerized data processing, data retrieval, and dental charting

Skill Demonstrations
5 - 10%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes, midterm, final exam

Exams
20 - 30%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
