## **COURSE CONTENT**

**Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

1. Explain water cycle concepts with a focus on Sonoma County water resources and needs.
2. Evaluate careers in water treatment technology.

**Objectives:**

At the conclusion of this course, the student should be able to:

1. Differentiate between ground water and surface water.
2. Define and contrast runoff, evaporation, and percolation.
3. Differentiate and rank sources of dissolved minerals and bacteria in water supplies.
4. Differentiate and analyze water quality and quantity in wells, rivers, and the ocean.
5. Define and summarize responsibilities of water distributors and water and waste water treatment plant operators.
6. Evaluate and summarize requirements for government certification as a water treatment plant operator, water distributor, or waste water treatment plant operator.
7. Identify and inventory major water uses and users in Sonoma County.
8. Distinguish among and summarize environmental technology course offerings.
9. Access information about local career opportunities in the fields of water treatment and water distribution technology.

**Topics and Scope:**

I. Water Cycle

A. Evaporation

B. Precipitation

C. Percolation

1. Agricultural water use

2. Ground water

3. Dissolved minerals

a. Natural sources

- b. Anthropogenic sources
        - i. Petroleum
        - ii. Pesticides
        - iii. Acid mine drainage
    - 4. Wells
    - 5. Municipal and domestic water use
  - D. Runoff
    - 1. Rivers
    - 2. Aquatic organisms
      - a. Fish
      - b. Birds
      - c. Mammals
      - d. Microorganisms
      - e. Water-borne diseases
    - 3. Reservoirs
    - 4. Sonoma County Water Agency Ranney collectors
    - 5. Wastewater discharges
  - E. Ocean
    - 1. Industrial water use
    - 2. Potential for municipal water use
- II. Sonoma County Water Professions
- A. Water treatment plant operators
    - 1. Introduction to water treatment technologies
    - 2. Responsibilities
    - 3. California state certification
  - B. Water distribution operators
    - 1. Introduction to water distributions technologies
    - 2. Responsibilities
    - 3. California state certification
  - C. Waste water treatment plant operators
    - 1. Introduction to waste water treatment technologies
    - 2. Responsibilities
    - 3. California state certification
  - D. Careers
    - 1. Opportunities
    - 2. Sources of information
    - 3. Other profession and education opportunities

**Assignment:**

- 1. Reading (approximately 40 pages) for the duration of the course
- 2. Research project
- 3. Quiz(zes) (1-3)
- 4. Final exam

**Methods of Evaluation/Basis of Grade:**

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Research project

Writing  
10 - 20%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Research project

Problem solving  
20 - 30%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations  
0 - 0%

**Exams:** All forms of formal testing, other than skill performance exams.

Quiz(zes) and exam

Exams  
50 - 70%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

None

Other Category  
0 - 0%

**Representative Textbooks and Materials:**

Instructor-prepared materials
