### **Certificate/Major Applicable:**

Major Applicable Course

## **COURSE CONTENT**

### **Student Learning Outcomes:**

Upon completion of the course, students will be able to:

1. Accurately describe and contrast theories in environmental philosophy (from the fields of ethics, aesthetics, political philosophy and, when relevant, epistemology and metaphysics).
2. Critically evaluate theories in environmental philosophy (from the fields of ethics, aesthetics, political philosophy and, when relevant, epistemology and metaphysics).
3. Apply selected environmental philosophies to current environmental issues.

### **Objectives:**

Upon successful completion of the course, students will be able to:

1. Explain the relationship between environmental philosophy and environmental science.
2. Describe and critique the traditional ethical theories that are relevant to environmental ethics (e.g. utilitarianism, deontology and natural law theory).
3. Evaluate the extent to which these theories place value upon various aspects of the natural environment (e.g. humans, animals, plants, species, ecosystems).
4. Describe and critique non-traditional theories in environmental ethics (e.g. biocentric ethics and the land ethic).
5. Describe and evaluate philosophies which emphasize a more metaphysical approach to environmental philosophy (e.g. Deep Ecology).
6. Describe and critique environmental philosophies that examine the interplay between the environment and social or economic issues (e.g. environmental justice, social ecology, and ecofeminism).
7. Describe and evaluate various theories in environmental aesthetics.
8. Compare and contrast how various environmental philosophies apply to selected global and/or local environmental issues or problems.

### **Topics and Scope:**

- I. Environmental Philosophy in Relation to Environmental Science
  - A. The role of philosophy in environmental studies
  - B. The role of science in environmental studies
  - C. The relationship between philosophy and science in environmental studies
- II. Traditional Ethical Theories in Environmental Philosophy
  - A. Utilitarianism
  - B. Rights theory
  - C. Contractarian theory
  - D. Natural Law theory
  - E. Deontology
- III. Non-traditional Ethical Theories in Environmental Philosophy
  - A. Life-centered (Biocentric) ethics
  - B. The Land Ethic (Ecocentrism)
  - C. Deep Ecology
- IV. Economic, Political and Social Issues in Environmental Philosophy
  - A. Environmental justice/environmental racism
  - B. Social ecology
  - C. Ecofeminism
- V. Environmental Aesthetics
  - A. Thoreau: Wildness and nature aesthetics
  - B. Environmental science as a basis for environmental aesthetics
  - C. Artistic criteria for environmental aesthetics
- VI. Philosophical Theories in Relation to Selected Environmental Issues
  - A. Environmental philosophy and population growth
  - B. Environmental philosophy and agriculture
  - C. Environmental philosophy and global warming
- VII. (Optional) Spiritual/Religious Approaches to Environmental Philosophy
  - A. Native American traditions
  - B. Buddhist and/or Hindu traditions
  - C. Taoism
  - D. Christianity

**Assignment:**

1. Regular reading assignments (20 - 30 pages a week)
2. Regular reading assessment: such as reading logs, brief summaries, brief response papers, or comprehension quizzes
3. Midterm assessments: examinations or short papers which demonstrate student ability to describe and critically evaluate positions in environmental philosophy and/or apply environmental philosophy to current environmental issues
4. Final assessment: exam, paper, or project that demonstrates student ability to describe and critically evaluate positions in environmental philosophy and/or apply environmental philosophy to current environmental issues
5. May include (up to 10%) a creative assignment (e.g. original poetry, art, performance) that involves creatively expressing or illustrating an environmental perspective
6. May include (up to 10%) participation

**Methods of Evaluation/Basis of Grade:**

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Short reading responses, midterm papers, final paper

Writing  
30 - 100%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving  
0 - 0%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations  
0 - 0%

**Exams:** All forms of formal testing, other than skill performance exams.

Multiple choice, essay exams, short answer

Exams  
0 - 70%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Participation (up to 10%); Creative project (up to 10%)

Other Category  
0 - 20%
