COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Analyze workflow issues involved in the design and programming of a web or mobile project.

2. Create a communication plan that facilitates decision making and collaboration between a development team and their client.

Develop templates for a web or mobile project, including writing a proposal, developing agile project management process documentation, and documenting the lifecycle of a project.
Work effectively as a member of the agile development team to develop a web or mobile project.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Develop goals, objectives and questions for meetings with clients.
- 2. Create a storyboard, timeline, work schedule, bid, and formal proposal for a web or mobile project.
- 3. Analyze existing web or mobile projects regarding: overall design, navigation, content, graphics and ease of use.
- 4. Discuss problems which arise when creating a web or mobile project and brainstorm possible solutions.

Topics and Scope:

I. Educating Clients

- A. Defining a web or mobile project
- B. Terminology
- II. Formulating Project Goals
 - A. Initial project proposal
 - B. Brainstorming and problem solving
 - C. Streamlining ideas
 - D. Facilitating goal setting
- III. Defining Target Users
 - A. Evaluating your audience
- B. Developing user stories to capture project requirements from user-centered perspective
- IV. Managing Agile Project Process
 - A. Developing a project schedule
 - B. Defining group roles
 - C. Assigning and managing tasks for team members using sprint model
 - D. Incorporating a kanban process for task management
 - E. Working to keep client informed
- V. Tracking Project Resources
 - A. Project estimates
 - B. Determining customer budget
 - C. Estimated cost versus actual cost
 - D. Managing customer changes
- VI. Writing a Project Proposal
 - A. Putting it all together
 - B. Goals
 - C. Research
 - D. Timeline
 - E. Budget
 - F. Contract
- VII. Communicating with the Customer and the Team
- VIII. Practicing User-Centered Design Development
 - A. Creating a user experience that attracts the target audience
 - B. Engaging in inspiration, ideation, and implementation methods
 - C. Applying best practices in interaction and visual design

IX. Developing Content

- A. Writing styles learning what works in web and mobile
- B. Type and style: make your words speak out
- C. Animation
- D. Video
- E. Audio
- X. Testing the Project
 - A. Debugging
 - B. Beta testing with a sample audience
- XI. Presentation of Final Design to Client
 - A. Discuss maintenance
 - B. Publicizing project

Assignment:

- 1. Conduct client meetings to discuss client needs for project, client approval of proposal, client approval of design and beta release, final client approval and project maintenance
- 2. Create a formal proposal for a web or mobile project
- 3. Document work such as storyboard and timeline on the project and compare the initial

proposal to the actual work completed

- 4. Research existing contracts and develop one which meets client needs
- 5. Use the Internet to research and develop appropriate written reports
- 6. Create a web or mobile project for a client
- 7. Critique other team projects regarding their: overall design, navigation, content, graphics and ease of use
- 8. Reading approximately 20-30 pages per week
- 9. Exams (6 8)
- 10. Quizzes

work

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written reports, such as formal proposal and document

work	
Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.	
Storyboard, timeline, bid, project documentation and contract	Problem solving 25 - 50%
Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.	
Create a project based on client needs; critique of projects	Skill Demonstrations 20 - 50%
Exams: All forms of formal testing, other than skill performance exams.	
Exams and quizzes	Exams 15 - 40%
Other: Includes any assessment tools that do not logically	

Other: Includes any assessment tools that do not logically fit into the above categories.
