BOTANY 10 Course Outline as of Spring 2022

CATALOG INFORMATION

Dept and Nbr: BOTANY 10 Title: PLANT BIOLOGY

Full Title: Plant Biology Last Reviewed: 1/28/2019

Units		Course Hours per Week		Nbr of Weeks	Course Hours Total	
Maximum	4.00	Lecture Scheduled	3.00	17.5	Lecture Scheduled	52.50
Minimum	4.00	Lab Scheduled	3.00	8	Lab Scheduled	52.50
		Contact DHR	0		Contact DHR	0
		Contact Total	6.00		Contact Total	105.00
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 105.00 Total Student Learning Hours: 210.00

Title 5 Category: AA Degree Applicable

Grading: Grade or P/NP

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly:

Catalog Description:

A general education course in plant biology emphasizing the structure and function of plants. Includes genetics, ecology, evolution, reproduction, and diversity of plant life forms.

Prerequisites/Corequisites:

Recommended Preparation:

Limits on Enrollment:

Schedule of Classes Information:

Description: A general education course in plant biology emphasizing the structure and function of plants. Includes genetics, ecology, evolution, reproduction, and diversity of plant life forms.

(Grade or P/NP)

Prerequisites/Corequisites:

Recommended:

Limits on Enrollment: Transfer Credit: CSU;UC. Repeatability: Two Repeats if Grade was D, F, NC, or NP

ARTICULATION, MAJOR, and CERTIFICATION INFORMATION:

AS Degree: Area Effective: Inactive:

C Natural Sciences Fall 1981

CSU GE: Transfer Area Effective: Inactive:

B2 Life Science Fall 1981 B3 Laboratory Activity

IGETC: Transfer Area Effective: Inactive:

5B Biological Sciences Fall 1981

5C Fulfills Lab Requirement

CSU Transfer: Transferable Effective: Fall 1981 Inactive:

UC Transfer: Transferable Effective: Fall 1981 Inactive:

Certificate/Major Applicable:

Both Certificate and Major Applicable

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Apply the scientific method and lab skills to the investigation and evaluation of biological phenomenon.
- 2. Synthesize knowledge of evolutionary mechanisms, trends, and history with patterns of biodiversity.
- 3. Integrate basic principles of cellular processes, anatomy, physiology, genetics, ecology, and evolution as they apply to plant systems.
- 4. Explain connections between humans, plants, and local and global environmental issues.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Outline the history of plant science.
- 2. Explain the methods of scientific investigation.
- 3. Categorize and explain the multiple factors associated with plant ecology, especially human impact on natural landscapes.
- 4. Examine plant morphology and anatomy, including cell structure and function, vegetative and reproductive morphology, major tissue systems and anatomy of roots, stems, leaves, flowers, fruits and seeds.
- 5. Describe plant physiological mechanisms, including cellular respiration, water relations, transport, nutrition, photosynthesis, growth and development.
- 6. Explain the basis of plant inheritance, including Mendelian, chromosomal and molecular genetics.
- 7. Describe processes of microevolution and macroevolution, including speciation and major trends in plant evolution
- 8. Compare and contrast the morphology and phylogenetic relationships of algae, bryophytes, seedless vascular plants, and seed plants.

- 9. Evaluate the relevance and importance of plants to human cultures.
- 10. Evaluate the importance of biodiversity and conservation efforts.

Topics and Scope:

- I. Botany as Science
 - A. Course introduction
 - B. The methods of natural science
 - C. Brief history of plant sciences
 - D. The importance of studying Botany
- II. Plant Ecology
 - A. Environmental constraints to plant distribution
 - B. Plant adaptation and evolutionary history
 - C. Vegetation types and communities
 - D. Ecosystem structure and function
 - E. Ecological succession
 - F. Ecosystem management
- III. Plant Structure
 - A. Cell structure and cell division
 - B. Major cell and tissue types
 - C. Morphology and anatomy of roots, stems, leaves, flowers, fruits and seeds
 - D. Functional morphology and adaptation
- IV. Plant Physiology
 - A. Diffusion, osmosis and passive transport
 - B. Plant water relations and xeric adaptations
 - C. Soil mineral nutrition
 - D. Plant metabolism and energetics
 - E. Photosynthesis
 - F. Cellular respiration
 - G. Internal and external regulation of growth and development.
- V. Plant Inheritance and Evolution
 - A. Mendelian patterns of inheritance
 - B. Chromosomal genetics
 - C. Polyploidy in plants
 - D. Mechanisms of microevolution and macroevolution
 - E. Major phylogenetic patterns
- VI. Plant Diversity
 - A. Algae
 - B. Bryophytes
 - C. Seedless vascular plants
 - D. Seed plants
- VII. Plant Ecology
 - A. Economic and ecological relevance of plants to humans
 - B. Plant biodiversity and conservation

All topics above will be covered in both lecture and lab.

Assignment:

Lecture-Related Assignments:

- 1. Assigned readings, approximately 20 40 pages weekly
- 2. Three to six page research paper (0 1)

- 3. Quizzes (2 10)
- 4. Exams (2 4)

Lab-Related Assignments:

- 1. Lab reports (1 8)
- 2. Lab practical exams (1 3)

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Research paper

Writing 0 - 20%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Lab report(s) and lab practical(s)

Problem solving 10 - 40%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations 0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes and exams

Exams 50 - 70%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category 0 - 0%
