COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Apply the principles of dental hygiene practice as they relate to general dentistry and the dental specialties
2. Discuss the scope of practice of the dental specialists and the Registered Dental Hygienist in Alternative Practice

Objectives:

Upon completion of this course, the student will be able to:

1. Discuss the steps to the state licensure process in becoming a registered dental hygienist
2. Explain how the principles of dental hygiene relate to each specialty, including the referral process
3. Describe the examination and diagnostic techniques used for patient assessment in determining when it is appropriate to refer a patient for specialty care with a periodontist, orthodontist, oral surgeon, oral medicine specialist
4. Discuss specific behavioral techniques that work with children and provide positive reinforcement particularly in a pediatric dental office
5. Explain the legal concepts in the dental hygienist-patient relationships, the dental hygienist-dentist relationship, and employer-employee relationships
6. Describe the role of the Registered Dental Hygienist in Alternative Practice (RDHAP) including their role in schools, care facilities, residences of homebound individuals, and dental health professional shortage areas
7. Apply ergonomic principles in dental hygiene practice and describe how repetitive strain injuries and other musculoskeletal disorders may impact longer-term employment

Topics and Scope:

 - 1. state patient/manikin
 - 2. fingerprinting
 - 3. law and ethics
- B. filing for licensure

XI. Overall Body Health in Dental Hygiene Practice

- A. body mechanics
- B. occupational induced injury and pain

Assignment:

- 1. Weekly guest speaker summary reports (13-17)
- 2. Readiness assignment evaluations (6-10)
- 3. Research Paper

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Weekly guest speaker summary reports, research paper

Writing
80 - 100%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Readiness assignment evaluations (6-10)

Problem solving
0 - 20%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

None

Exams
0 - 0%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
