Total Out of Class Hours: 105.00

Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: CHLD 90.2

Catalog Description:

In this course, students will focus on the appropriate use of observation and assessment methods to document and promote young children's growth and development. Students will be introduced to and utilize a number of recording strategies (e.g., rating systems, portfolios, and multiple assessment tools, etc.) in designing culturally and developmentally appropriate curriculum to optimally support children and families.

Prerequisites/Corequisites:

Completion of CHLD 10 and CHLD 51; OR Completion of CHLD 110.1, 110.2 and CHLD 51

Recommended Preparation:

Eligibility for ENGL 1A or ESL 10

Limits on Enrollment:**Schedule of Classes Information:**

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Apply skills for culturally and developmentally appropriate observations and assessments of young children in all domains of development.
2. Compare and contrast the characteristics, strengths, and limitations of commonly used observational and assessment tools for a variety of planning and assessment purposes.
3. Understand the professional, legal, and ethical uses of observation data when effectively collaborating with families and other professionals.

Objectives:

At the conclusion of this course, the student should be able to:

1. Describe the behavior of young children in all domains of development with sensitivity to developmental, cultural, and linguistic appropriateness.
2. Examine a variety of individual, social, cultural, and political factors that impact assessment practices in early childhood settings.
3. Describe the essential characteristics of a variety of widely used observation and assessment methods and tools.
4. Identify and evaluate logistical challenges, biases, and preconceptions related to the process of observing and assessing children.
5. Utilize observation and assessment tools and methods to assess children's interests, behaviors, and development.
6. Utilize observation and assessment tools and methods to identify quality characteristics and recommend changes in early childhood programs, including environment, curriculum, and care

routines in a variety of early childhood settings.

7. Use objective observation and assessment strategies to effectively collaborate with families and other professionals.

8. Demonstrate knowledge of the legal and ethical responsibilities related to carrying out observations and assessments in early childhood settings.

Topics and Scope:

I. Authentic, Observation-based Assessment

- A. The research and rationale supporting the use of authentic observation-based assessment
- B. Basic assumptions about the role of assessment in learning and teaching

II. Sociopolitical Influences on Assessment Practices

- A. National and state educational goals for early childhood programs
- B. School readiness
- C. Standards-based curricula and assessment
- D. Cultural influences
- E. Assessment to inform teaching practices and teacher accountability
- F. Recommendations from professional organizations

III. Developmental Considerations

- A. Ages and stages of development
- B. Atypical development
- C. Early brain development
- D. Learning styles and modalities
- E. Dual language learners

IV. Guidelines for Observing Children

- A. Legal and ethical responsibilities
- B. Objectivity and personal bias
- C. Appropriate procedures for child observation
- D. Key elements of observation
- E. Naturalistic setting
- F. Methods of recording and documenting
 - 1. Anecdotal notes
 - 2. Running records
 - 3. Work samples
 - 4. Time sampling
 - 5. Event sampling
 - 6. Checklists and rating scales
 - 7. Photography, audio, and video recording

V. Types of Assessment Tools Used in Early Childhood Programs

- A. Checklists and summaries: California Desired Results Developmental Profile (DRDP)
- B. Environmental Rating Scales
- C. Other assessment methods

VI. Portfolios

- A. Collecting and organizing observations and work samples
- B. Analyzing portfolio assessments
- C. Documentation

VII. Interpreting Observation Data

- A. Using a developmental continuum to interpret observational data
- B. Summarizing and documenting assessment findings for individual children and groups

VIII. Applying Observation Data to Support Children and Programs

- A. Curriculum development and planning
- B. Emergent curriculum based on observations

- C. Adult-child interactions
- D. Environmental changes and enhancements
- E. Early and ongoing intervention
- IX. Communicating and Collaborating with Parents and Other Professionals
 - A. Obtaining information from families about their children
 - B. The collaborative conference
 - C. Communicating children's needs to staff and other professionals

Assignment:

1. Reading and discussion of assigned text and/or articles. Approximately 25 pages per week.
2. Observation, documentation, and written analysis of children's development, interests, skills, and behaviors. Approximately 5-8 written observation of 750-1250 words each.
3. Written reflective responses. Approximately 3-5 essays of 750-1250 words.
4. Case study of one child resulting in a developmental summary with a family communication plan and recommendations for curriculum, environment, and professional responses as appropriate to findings. Approximately 1000-1500 words.
5. Final Essay Exam.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written reflective responses, Written analysis of observational data, Case study

Writing
50 - 65%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving
0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Observation and documentation of children using various tools and methods

Skill Demonstrations
20 - 35%

Exams: All forms of formal testing, other than skill performance exams.

Final Exam

Exams
10 - 15%

Other: Includes any assessment tools that do not logically fit into the above categories.

Participation and in-class discussions

Other Category
5 - 10%
