		Contact Total	4.00		Contact Total	70.00
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 35.00 Total Student Learning Hours: 105.00

Title 5 Category: AA Degree Applicable

Grading: Grade or P/NP

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: ARCH 27

#### **Catalog Description:**

Introduction to the use of Revit for 3D modeling of architecture, interior design, and/or landscape design projects.

# **Prerequisites/Corequisites:**

## **Recommended Preparation:**

Eligibility for ENGL 100 or ESL 100 and completion of CS 5

#### **Limits on Enrollment:**

#### **Schedule of Classes Information:**

Description: Introduction to the use of Revit for 3D modeling of architecture, interior design,

and/or landscape design projects. (Grade or P/NP)

Prerequisites/Corequisites:

Recommended: Eligibility for ENGL 100 or ESL 100 and completion of CS 5

Limits on Enrollment: Transfer Credit: CSU;

Repeatability: Two Repeats if Grade was D, F, NC, or NP

## **Certificate/Major Applicable:**

Both Certificate and Major Applicable

## **COURSE CONTENT**

## **Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

- 1. Create 3D geometry for modeling of architectural, interior design, and/or landscape design projects using computer software applications.
- 2. Produce rendered images, screen-captured images, and animations of architectural, interior design, and/or landscape design projects.

# **Objectives:**

During this course, students will:

- 1. Effectively use 3D modeling programs to support 2D and 3D design development and design presentations.
- 2. Effectively use digital tools to apply texture, color, light and shadows to models.
- 3. Export models and views to other programs.
- 4. Import image or model information from other sources to use in model construction.
- 5. Print or plot graphic representations of 3D models in hidden line, grayscale and color.
- 6. Use digital modeling skills in preparing rendered and captured images of architectural, interior design, and/or landscape design projects.
- 7. Provide guided and animated tours of digitally created environments.

# **Topics and Scope:**

- I. Role of 3D Models in Studying Forms and Presenting Design Concepts in Architecture, Interior Design, and Landscape Design
- II. Principles and Concepts of 3D Modeling and Rendering
  - A. 2D geometry
  - B. Aspects of materials such as: value, color, and texture
  - C. Aspects of form and volume such as: space, scale, balance, rhythm, and proportion
  - D. Aspects of visualization such as: light, focal point, and emphasis

### III. Introduction to Revit

- A. Program interface components
- B. Creating 2D geometries
- C. Modeling 3D forms
- D. Identifying and applying textures and colors

- E. Depicting light and shadow
- F. Importing and exporting information from Sketch-Up, AutoCAD, and/or Rhino 3D
- G. Preparing rendered/captured images
- H. Generating animations
- I. Digital tours of the model/environment
- J. Printing and plotting
- IV. Application to Architectural, Interior Design, and Landscape Environments
- V. Presenting the Results of Digital Modeling
- VI. Oral Presentations and Critiques

All topics are covered in both the lecture and lab portions of this course.

## **Assignment:**

Lecture Related Assignments:

- 1. Reading: Textbook or instructor provided handouts (20- 40 pages per week)
- 2. Quizzes (1-3)
- 3. Final exam or modeling project presentation

Lab Related Assignments:

- 1. Modeling exercises (6-12)
- 2. Guided tours of models (2-4)
- 3. Oral presentations and critiques (6-8)

#### Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing 0 - 0%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Modeling exercises

Problem solving 40 - 60%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Guided tours of models

Skill Demonstrations 10 - 20%

**Exams:** All forms of formal testing, other than skill performance exams.

Quizzes and final exam or modeling project presentation

Exams 10 - 30%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Oral presentations and critiques		Other Category 5 - 15%
----------------------------------	--	---------------------------

**Representative Textbooks and Materials:**Autodesk Revit 2017 for Architecture: No Experience Required. Wing, Eric. Sybex. 2016 Instructor prepared materials
