COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Explain the organization of the construction industry and the role of the construction manager.
2. Describe the fundamentals of construction contracts.
3. Define the stages of the construction project cycle.

Objectives:

At the conclusion of this course, the student should be able to:

1. Analyze the construction project cycle.
2. Document the roles of participants in the project process.
3. Describe the responsibilities of the construction manager.
4. Interpret and write a simple contract.
5. Interpret construction documents, including contract general conditions.
6. Correctly utilize construction terminology.

Topics and Scope:

- I. Introduction to the Design and Construction Process
 - A. Roles and responsibilities of owner and architect during design
 - B. Roles and responsibilities of owner, contractor, subcontractor, architect and construction manager during construction
 - C. California construction industry organization
 - D. Sustainability issues
- II. The Construction Project Cycle
 - A. Overview
 - B. Stages in the process
 - C. Documentation of the process
- III. Contract Documents: Working Drawings, Specifications and Regulatory Authority Documentation

- A. Contents and interpretation
- B. Retrieving information
- C. Using working drawings
- D. Adenda
- IV. Contracts
 - A. Elements of a contract
 - B. Types of construction contracts: Stipulated sum contracts, cost-plus-fee contracts, unit price contracts and contracts with quantities
 - C. General Conditions of a contract
 - D. Supplemental Conditions of a contract
 - E. Subcontracts and supply contracts
- V. Bonding and Insurance
 - A. Types of bonds and insurance
 - B. Owner and contractor responsibilities
- VI. The Bid Process: Competitive and Negotiated
 - A. Types of bidding
 - B. Examination of contract documents
 - C. Role of the quantity survey and the estimate
 - D. Preparing for bidding or negotiating
 - E. Bid selection
 - F. Pre-construction planning and scheduling
- VII. Building the Project
 - A. Roles and responsibilities of owner, contractor, subcontractor, architect and construction manager
 - B. Types of schedules: time, labor, materials, money
 - C. Site management
 - D. Building inspection
 - E. Project closeout procedures
- VIII. Typical Construction Reports
 - A. Change Orders and contract extras
 - B. Construction costs
 - C. Common construction claims and their documentation
- IX. Dispute Resolution Options
 - A. Arbitration
 - B. Mediation
 - C. Legal actions

Assignment:

1. Reading (20-30 pages each week)
2. Written homework involving analysis and synthesis of course material (6-10)
3. Research and prepare one simple contract
4. Research paper (3-5 pages)
5. Quizzes (2-3)
6. Final exam and/or final project and presentation

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Homework, research paper, and simple contract

Writing
40 - 60%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving
0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes and/or exams

Exams
20 - 40%

Other: Includes any assessment tools that do not logically fit into the above categories.

Class participation and/or presentation of final project

Other Category
0 - 20%
