Title 5 Category:	AA Degree Applicable
Grading:	Grade Only
Repeatability:	00 - Two Repeats if Grade was D, F, NC, or NP
Also Listed As:	
Formerly:	APTECH 55

Catalog Description:

In this course, students will learn drawing-based manual drafting with a cursory introduction to Computer-Aided Drafting (CAD) for comparison. Topics include proper use of drafting tools, development of linework and lettering skills, procedures for geometric constructions, freehand drafting/sketching, orthographic projection, and isometric drawing.

Prerequisites/Corequisites:

Recommended Preparation:

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Describe the role of drawing and drafting in contemporary industries
- 2. Utilize manual drafting equipment to produce technical drawings
- 3. Compare manual drafting to Computer-Aided Drafting (CAD) methods

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Describe drafting career and employment opportunities in contemporary industries
- 2. Select appropriate drafting equipment and supplies
- 3. Utilize drafting tools effectively in the production of drafting projects
- 4. Produce consistent linework on drafting projects
- 5. Produce legible lettering in drafting projects
- 6. Execute geometric constructions
- 7. Execute sketching and freehand drafting
- 8. Develop orthographic projections and isometric drawings
- 9. Utilize dimensioning conventions
- 10. Prepare hand-drafted working drawings
- 11. Compare manual-drafting to CAD-drafting processes

Topics and Scope:

- I. Introduction to Contemporary Drafting
 - A. History of the profession
 - B. Drafting occupations and industries
 - C. Language of drawing
 - D. Design process

- E. Contemporary drafting
- F. Types of basic engineering graphics
- II. Drafting Equipment and Supplies
 - A. Conventional drafting supplies
 - B. Conventional drafting equipment
 - C. Production of copies and prints
- III. Drafting Conventions and Formats
 - A. Linework
 - 1. Conventions
 - 2. Use of tools
 - 3. Drawing procedure
 - 4. Construction linework
 - 5. Reproducible linework
 - B. Lettering
 - 1. Conventions
 - 2. Lettering shapes
 - 3. Lettering practice
 - C. Drafting conventions
 - D. Drawing formats
- IV. Geometric Construction
 - A. Use of compass and other tools for geometric constructions
 - B. Basic geometric drafting techniques
 - 1. Dividing lines
 - 2. Constructing regular polygons
 - C. Complex geometric constructions
 - 1. Tangencies of lines, arcs, and circles
 - 2. Fillets
- V. Freehand drawing
 - A. Sketching for technical drawings
 - B. Freehand drafting techniques
- VI. Introduction to Multiview Orthographic Projection
 - A. Principles
 - 1. Selection of views
 - 2. Freehand three-view drawings
 - 3. Planes of projection
 - 4. Angles of projection
 - 5. Visualization
 - B. Drawing procedures
 - C. Orthographic projections from incomplete data
 - D. Isometric drawing
 - 1. Introduction to isometrics
 - 2. Drawing isometrics using instruments
- VII. Dimensions and Tolerances
 - A. Systems of dimensioning
 - B. Dimensioning elements
 - C. Dimensioning guidelines
 - D. Tolerancing basics
 - E. Surface finish notation
- VIII. Overview of CAD applications Comparison of Manual Drafting to CAD

All topics are covered in the lecture and lab portions of the course.

Assignment:

Lecture-Related Assignments:

- 1. Weekly reading assignments (1-5 pages)
- 2. Quiz(zes) (1-3)
- 3. Final exam

Lab-Related Assignments:

- 1. Linework and lettering exercises (2-5)
- 2. Manually drafted technical drawings (6-8)

Lecture- and Lab-Related Assignments:

- 1. Freehand drawing exercises (4-8)
- 2. Geometric construction exercises (5-10)
- 3. Orthographic and isometric projection sketches (5-10)
- 4. Basic CAD drawing(s) (1-2)

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Exercises; drawings; sketches

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Quiz(zes)

Exams: All forms of formal testing, other than skill performance exams.

Quiz(zes); final exam

Other: Includes any assessment tools that do not logically fit into the above categories.

Participation

Representative Textbooks and Materials:

Writing 0 - 0%

Problem solving 60 - 70%

Skill Demonstrations 5 - 10%

Exams 15 - 25%

Other Category 0 - 10% Fundamentals of Modern Drafting. 2nd ed. Wallach, Paul Ross. Cengage Learning. 2014 (classic). Instructor prepared materials
