Catalog Description:

This course introduces the student to the role of accounting in processing and reporting the effects of economic transactions. It examines financial accounting from both the user and preparer perspectives. It teaches how information is processed and reported by the accounting information system as well as how the reports are used by investors and creditors in making decisions. The economic transactions are also analyzed by type of business activity: operating, investing, or financing and their impact on cash flows and profitability for both service and merchandising concerns. The ability to perform basic spreadsheet functions is highly recommended. The course objectives comply with the California Core Competency Model developed by the California Society of Certified Public Accountants' Committee on Accounting Education. This course will prepare the transfer degree and/or certificate student for business or accounting programs.

Prerequisites/Corequisites:**Recommended Preparation:**

Eligibility for ENGL 100 OR EMLS 100 (formerly ESL 100) or equivalent

Limits on Enrollment:

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Complete the steps in the accounting cycle and apply generally accepted accounting principles
to determine how transactions are recorded and reported.
2. Analyze, record, summarize, and report the effects of transactions in financial accounting and interpret the accounting information for internal or external decision making purposes.
3. Demonstrate critical thinking skills, analytical ability, interpersonal and collaborative skills, and the ability to write business reports.

Objectives:

At the conclusion of this course, the student should be able to:

1. Explain how accounting meets the information needs of investors, creditors, managers,

- regulatory agencies, and taxing authorities.
2. Explain the principles, procedures, and concepts underlying the primary financial statements.
 3. Explain how an accounting system is designed to meet the needs of specific businesses; and how to input transactions, process this input and prepare and interpret the financial statements.
 4. Determine the economic transactions for both a service and merchandising concern from the source document through the closing process.
 5. Analyze the difference in accounting methods allowed under generally accepted accounting principles (GAAP) in the accounting for various assets, liabilities and equity transactions.
 6. Categorize the types of business transactions as being operating, investing or financing activities.
 7. Compare the difference between accrual based measurements and cash flows from activities.
 8. List the various ratio and percentage analysis tests along with different financial statements used by people to make better economic decisions.
 9. Make ethical choices displaying honesty and integrity to avoid any legal action protecting your reputation as well as the company's reputation.
 10. Demonstrate analytical, interpersonal, and communication skills in solving problems.

Topics and Scope:

 - C. Direct and indirect methods of computing cash flows from operations
 - D. Noncash investing and financing activities
 - E. Preparing the statement of cash flows
 - F. Use of cash flow information
- X. Financial Statement Analysis
 - A. Horizontal and trend analysis
 - B. Vertical analysis

- C. Common-size statements
- D. Ratio analysis:
 1. Profitability analysis
 2. Liquidity analysis
 3. Solvency analysis
 4. Market tests analysis
- E. Limitations of financial statements and analysis
- F. Upholding personal ethical standards and integrity to prevent harm to firms or self when preparing confidential financial statements and reports

Assignment:

1. Reading of text and other written material (20 to 30 pages per week)
2. Homework involving problem solving and calculational skills
3. Group case research, report, analysis, and presentation
4. Exams (2 - 6), mid-term(s) and final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Group case research, report, analysis, and presentation	Writing 10 - 30%
---	---------------------

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems	Problem solving 10 - 25%
-------------------	-----------------------------

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Group case research, report, analysis, and presentation	Skill Demonstrations 10 - 30%
---	----------------------------------

Exams: All forms of formal testing, other than skill performance exams.

Exams, mid-term(s) and final exam	Exams 30 - 60%
-----------------------------------	-------------------

Other: Includes any assessment tools that do not logically fit into the above categories.

Participation	Other Category 5 - 10%
---------------	---------------------------
