COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Perform and explain CPR (cardiopulmonary resuscitation) and obstructed airway skills.
2. Perform and explain standard first aid skills which include: comprehensive victim assessment, control of severe bleeding, wound care, treatment for shock, burns, bone, joint and muscle injuries, heat and cold exposure, and sudden illness.
3. Qualify for a completion certificate in First Aid training.

Objectives:

At the conclusion of this course, the student should be able to:

1. Assess an unconscious person
2. Perform Cardiopulmonary Resuscitation (CPR)
3. Perform obstructed airway skills
4. Place an unconscious victim (who is breathing) in the recovery position
5. Perform a comprehensive assessment on a conscious person who is injured or has a sudden illness
6. Recognize the signs and symptoms of cardiovascular emergencies (including heart attack, angina, and stroke)
7. Administer first aid for control of external bleeding and internal bleeding
8. Provide first aid for wounds and embedded objects
9. Administer first aid for shock (including anaphylaxis)
10. Administer first aid for thermal, chemical, and electrical burns
11. Administer first aid for bone and joint injuries (including fractures, dislocations, sprains, and strains)

12. Provide first aid for diabetic emergencies
13. Administer first aid for seizures
14. Administer first aid for heat related emergencies (including heat cramps, heat exhaustion, and heat stroke)
15. Provide first aid for cold related emergencies (including frost bite and hypothermia)

Topics and Scope:

I. First Aid Practices

- A. Assessment of an unconscious victim
- B. CPR
- C. Obstructed airway (conscious and unconscious)

II. Standard first aid skills

- A. Comprehensive victim assessment
 1. Obtain consent
 2. Identify chief complaint
 3. Perform head-to-toe assessment
 4. Obtain medical history

B. Bleeding:

1. External
2. Internal

C. Shock

1. Prevention and treatment
2. Signs and symptoms
3. Anaphylaxis

D. Wound care

1. Cleaning wound
2. Preventing infection
3. Embedded objects

E. Burns

1. Thermal
2. Chemical
3. Electrical

F. Bone and joint injuries

1. Fractures
2. Dislocations
3. Sprains
4. Strains

G. Sudden illness (medical emergencies)

1. Diabetic
2. Heart attack
3. Angina
4. Stroke
5. Fainting
6. Seizures

H. Heat related emergencies

1. Heat cramps/muscle spasms
2. Heat exhaustion
3. Heat stroke
4. Cold related emergencies
5. Frostbite
6. Hypothermia

Assignment:

1. Reading: weekly textbook chapter(s) of approximately 20-25 pages each
2. Writing: weekly written assessments
3. Skills demonstrations: weekly skill demonstration exercises
4. Exams: weekly quizzes and final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Weekly written assignments

Writing
10 - 20%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving
0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Weekly skills demonstrations

Skill Demonstrations
20 - 50%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes and final exam

Exams
20 - 50%

Other: Includes any assessment tools that do not logically fit into the above categories.

Class attendance and participation

Other Category
0 - 10%
