COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Explain and perform cardiopulmonary resuscitation (CPR), obstructed airway management, and automated external defibrillation.
2. Develop the skills needed to recognize and respond to a variety of first aid, breathing, and cardiac emergencies.

Objectives:

At the conclusion of this course, the student should be able to:

1. Assess an unconscious person
2. Perform cardiopulmonary resuscitation (CPR)
3. Perform obstructed airway skills
4. Use an automated external defibrillator on an unconscious subject
5. Place an unconscious victim (who is breathing) in the recovery position
6. Perform a comprehensive exam on a conscious person who is injured or has a sudden illness (including consent to administer care, head-to-toe exam, and medical history)
7. Recognize the signs and symptoms of cardiovascular emergencies (including heart attack, angina, and stroke) and administer first aid care
8. Administer first aid for control of external bleeding and internal bleeding
9. Provide first aid for wounds, amputations and impaled objects
10. Administer first aid for shock (including anaphylaxis)
11. Administer first aid for thermal, chemical, and electrical burns
12. Administer first aid for bone and joint injuries (including fractures, dislocations, sprains, and strains)
13. Provide first aid for diabetic emergencies
14. Administer first aid for seizures

15. Administer first aid for heat related emergencies (including heat cramps, heat exhaustion, and heat stroke)
16. Provide first aid for cold related emergencies (including frost bite and hypothermia)

Topics and Scope:

I. Cardiopulmonary Resuscitation

- A. Activating Emergency Medical Services (EMS) systems
- B. Recognizing the sign and systems of a heart attack
- C. Determining cardiac arrest
- D. Administering artificial respiration and one rescuer CPR techniques
- E. Performing the obstructed airway procedures for a conscious and unconscious person
- F. Performing practical skills

II. Automated External Defibrillators

III. First Aid and Emergency Care

- A. Conducting a primary and secondary survey
 1. Obtain consent
 2. Identify chief complaint
 3. Perform head-to-toe exam
 4. Obtain medical history
- B. Controlling bleeding
 1. External
 2. Internal
- C. Shock
 1. Prevention and treatment
 2. Signs and symptoms
 3. Anaphylaxis
- D. Wound care
 1. Cleaning wound
 2. Preventing infection
 3. Tetanus booster
 4. Amputations
 5. Embedded objects
- E. Burns
 1. Thermal
 2. Chemical
 3. Electrical
- F. Bone and joint injuries
 1. Fractures
 2. Dislocations
 3. Sprains
 4. Strains
- G. Sudden illness (medical emergencies)
 1. Diabetic
 2. Heart attack
 3. Angina
 4. Stroke
 5. Fainting
 6. Seizures
- H. Heat-related emergencies
 1. Heat cramps/muscle spasms
 2. Heat exhaustion

3. Heat stroke
- I. Cold-related emergencies
 1. Frostbite
 2. Hypothermia

Assignment:

1. Reading textbook or other instructions
2. CPR skills exam covering CPR, obstructed airway, and use of an AED
3. First aid skills exam covering comprehensive victim exam, bleeding, shock, bandaging, and splinting
4. Final written exam for certification

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving
0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

CPR skills exam; first aid skills exam

Skill Demonstrations
50 - 50%

Exams: All forms of formal testing, other than skill performance exams.

Final written exam

Exams
50 - 50%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
