PHYZ 58 Course Outline as of Summer 2025

CATALOG INFORMATION

Dept and Nbr: PHYZ 58 Title: INTRO HUMAN PHYSIO

Full Title: Introduction to Human Physiology

Last Reviewed: 1/27/2020

Units		Course Hours per Week		Nbr of Weeks	Course Hours Total	
Maximum	3.00	Lecture Scheduled	2.00	17.5	Lecture Scheduled	35.00
Minimum	3.00	Lab Scheduled	3.00	6	Lab Scheduled	52.50
		Contact DHR	0		Contact DHR	0
		Contact Total	5.00		Contact Total	87.50
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 70.00 Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade or P/NP

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: PHYSIO 58

Catalog Description:

This is an introductory course in human physiology, organized around body systems and the theme of homeostasis. The course is designed for the beginning student preparing for these health-related fields: vocational nursing, radiologic technology; or those with a general interest in the function of the human body. This course will minimize bio-chemical and quantitative details taught in a general physiology course (e.g., PHYSIO 1), focusing on the fundamental concepts of physiology. (Not intended for nursing (RN), dental hygiene, or physical therapy majors.)

Prerequisites/Corequisites:

Recommended Preparation:

Course Completion of CHEM 60 and Eligibility for ENGL 1A or equivalent

Limits on Enrollment:

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Describe the functions of the organ systems of the body and how each organ system contributes to control of homeostasis.
- 2. Describe the physiological basis for a number of major diseases and disorders of the human body.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Define homeostasis and explain how feedback mechanisms function to maintain homeostasis.
- 2. Describe the function of the organ systems of the body, including the nervous, endocrine, muscular, circulatory, respiratory, digestive, urinary, immune, reproductive systems.
- 3. Identify the roles of the nervous and endocrine systems in regulation of other organ systems.
- 4. Compare and contrast the basic mechanisms by which organ systems of the body maintain homeostasis.
- 5. Explain how the structure and function of cells support the function of organ systems.
- 6. Conduct simple physiological experiments using standard laboratory equipment.

Topics and Scope:

I. Introductory Concepts

- A. scientific method
- B. levels of biological organization
- C. homeostasis
- II. Cell Structure and Function
 - A. macromolecules
 - B. organelles
 - C. cell membranes
 - D. ATP (adenosine triphosphate) and enzymes
- III. Control Systems: Nervous and Endocrine
 - A. neurons, membrane potentials, synapses
 - B. structure and function of CNS (central nervous system), PNS (peripheral nervous system), ANS (autonomic nervous system)
 - C. sensory receptors, transduction
 - D. endocrine glands, hormones
- IV. Muscle System
 - A. skeletal, cardiac, smooth muscle
 - B. muscle contraction
- V. Circulatory System
 - A. basic plan of circulation
 - B. cardiac cycle
 - C. blood vessels and blood pressure
 - D. regulation of cardiac output, blood pressure
 - E. basis for heart attack, hypertension, atherosclerosis
- VI. Respiratory System
 - A. ventilation
 - B. gas exchange
 - C. regulation of respiratory rate
 - D. description of chronic obstructive pulmonary disease
- VII. Urinary System
 - A. formation of urine
 - B. regulation of salt and water balance
 - C. regulation of acid base balance
- VIII. Digestive System
 - A. organs and enzymes of digestion
 - B. factors that affect absorption
- IX. Immune System
 - A. injury and infection
 - B. organs, cells and molecules that provide immune defense
- X. Reproductive System
 - A. organs and hormones involved in sperm production
 - B. organs and hormones of menstrual cycle, pregnancy, parturition, lactation
- XI. Laboratory Exercises
 - A. homeostasis
 - B. osmosis
 - C. enzyme activity
 - D. reflex arc
 - E. senses
 - F. muscle contraction
 - G. cardiac function
 - H. pulmonary function
 - I. renal function
 - J. acid base balance

Assignment:

Lecture-Related Assignments:

- 1. Read 25 40 pages of text per week
- 2. Written assignments (2 5)

Lab-Related Assignments:

- 1. Perform weekly laboratory experiments with data collection
- 2. Written laboratory reports (12 16)

Lecture- and Lab-Related Assignments:

1. Examinations: Four combined lecture and lab exams, a cumulative final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Lab reports and written assignments

Writing 10 - 30%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving 0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations 0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Exams and cumulative final exam

Exams 60 - 80%

Other: Includes any assessment tools that do not logically fit into the above categories.

Class participation

Other Category 0 - 10%

Representative Textbooks and Materials:
