COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Summarize the properties of project, phases, schedules, roles and responsibilities, and cost controls, as well as identifying the basic aspects of Agile methodology
2. Predict the impact of various constraint variables and influences throughout the project and explain the importance of risk strategies and activities
3. Understand appropriate communication methods of influence and use change management procedures within the context of a project
4. Compare and contrast various project management tools and analyze project and partner-centric documentation

Objectives:

At the conclusion of this course, the student should be able to:

1. Manage the project life cycle
2. Coordinate small-to-medium-size projects
3. Ensure appropriate communication
4. Manage resources and stakeholders
5. Maintain project documentation
6. Support the completion of larger projects

Topics and Scope:

- I. Fundamentals and Methodologies of Project Management
- II. Project Plans and Management Tools
- III. Work Breakdown Structure and Activity Lists
- IV. Project Schedule
- V. Project Staffing and Quality Management Plans
- VI. Effective Communication, Change Management and Transition Plans
- VII. Risk Management Plan, Risk Analysis, and Risk Response Plan
- VIII. Project Performance, Constraints, Risks and Procurements
- IX. Project Closure Activities

Assignment:

Reading assignments include:

1. Online research of project management practices
2. Approximately 50 pages weekly from the textbook

Homework problems include:

1. Weekly online discussion thread participation
2. Hands-on exercises to demonstrate proficiency with topics
3. Online quizzes (5 - 12)
4. Assignments for project management practices

Other assignments include:

1. Skill demonstration examinations
2. Classroom scenario-based exercises

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Weekly written online discussions	Writing 5 - 10%
Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.	
Homework problems, assignments for project management practices	Problem solving 15 - 30%
Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.	
Class performances of project management practices and skill demonstration examinations	Skill Demonstrations 20 - 30%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes and skill demonstration examinations

Exams
20 - 30%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation in scenario-based exercises

Other Category
5 - 20%
