Catalog Description:

For students majoring in chemistry, biochemistry, chemical engineering, or a closely related field such as molecular and cell biology. The first semester of an intensive one-year program based upon modern theoretical concepts of organic chemistry. All aspects of fundamental organic chemistry are studied, including nomenclature, chemical and physical properties, reactions and synthesis. The study includes theoretical aspects, reaction mechanisms, and multistep synthesis. Students transferring from a four year college or university are expected to complete this sequence prior to their junior year.

Prerequisites/Corequisites: Chem 4B or Chem 5.

Recommended Preparation:

Limits on Enrollment:

Schedule of Classes Information:

Description: The first semester of an intensive one-year program based upon modern theoretical concepts of organic chemistry. Emphasis is placed on aliphatic and aromatic hydrocarbons,

nucleophilic substition and elimination reactions, stereochemistry, nuclear magnetic resonance spectroscopy, and infrared spectroscopy. (Grade Only) Prerequisites/Corequisites: Chem 4B or Chem 5. Recommended: Limits on Enrollment: Transfer Credit: CSU:UC. Repeatability: Two Repeats if Grade was D, F, NC, or NP

COURSE CONTENT

Outcomes and Objectives:

Upon successful completion of this course the student will be able to:

- 1. Predict and explain three-dimensional structures, including conformational changes, for organic compounds.
- 2. Name organic compounds.
- 3. Predict structures for products of organic reactions.
- 4. Predict and explain relative physical properties of organic compounds.
- 5. Predict and explain relative reactivities of organic compounds.
- 6. Suggest appropriate methods for the syntheses of organic compounds.
- 7. Predict and explain mechanisms for organic reactions.
- 8. Make observations and apply chemical concepts in the laboratory.
- 9. Use common laboratory techniques to synthesize, isolate, purify, and identify organic compunds.
- 10. Analyze compounds by instrumental methods.

Topics and Scope:

LECTURE MATERIAL

- 1. Bonding and structure of organic compounds
- 2. Alkanes and Cycloalkanes
- 3. Stereochemistry
- 4. Alkenes and Alkynes
- 5. Nucleophilic Substitution and Elimination Reactions
- 6. Dienes
- 7. Aromaticity and Aromatic Compounds
- 8. Spectroscopy

LABORATORY MATERIAL

- 1. Crystalization
- 2. Melting Point Determination
- 3. Spectroscopy
- 4. Distillations
- 5. Chromatography
- 6. Extraction
- 7. Nuclear Magnetic Resonance Spectroscopy
- 8. Infrared Spectroscopy
- 9. Isolation of Organic Compounds
- 10. Synthesis of Organic Compounds
- 11. Structure Determination
- 12. Instrumental Methods

Assignment:

- 1. Specific reading and study assignments averaging 40-50 pages per week.
- 2. Completion of end-of-chapter exercises averaging 20-25 problems per week.
- 3. Laboratory experiments: identification of unknowns and products of reactions by physical, instrumental, and spectroscopic methods.
- 4. A written laboratory report on each experiment detailing accomplishments.
- 5. Four to six lecture and laboratory exams plus a comprehensive final exam.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Lab reports

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Lab reports

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Writing 10 - 25%

Problem solving 5 - 10%

Lab skill technique/accurate lab results

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, Completion, Problem solving and short essay

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Representative Textbooks and Materials:

Organic Chemistry, 7th ed., Francis Carey, McGraw Hill, 2008 Organic Chemistry, 3rd ed., Maitland Jones, Jr., W.W. Norton & Co, 2004 Introduction to Organic Laboratory Techniques: A Microscale Approach, 4th ed., Pavia, Lampman, Kriz, and Engel, Brooks/Cole, 2007

Experimental Organic Chemistry, Daniel Palleros, Wiley, 2000

Exams 60 - 80%

Skill Demonstrations

1 - 5%

Other Category 0 - 0%
