Certificate Applicable Course

COURSE CONTENT

Outcomes and Objectives:

Students will:

- A. Study non-ferrous metals from periodic table.
- B. Identify non-ferrous metals by experimentation.
- C. Learn to heat treat non-ferrous alloys.
- D. Describe applications of design, manufacturing, and fabrication applicable to non-ferrous metals.

Topics and Scope:

1. Introduction and review of ferrous metals.
2. History and developments of non-ferrous metal materials.
3. Non-ferrous metals - use and applications.
4. Testing equipment procedures.
5. Research and design methods.
6. Library use and research of data base for non-ferrous alloys.
Numbering system.
7. Heat treating mediums and solutions.
8. Review and final.

Assignment:

The following assignments will determine student's final grade.

- A. Reading assignments - weekly.
- B. Lab reports - on lab experiments.
- C. Mid-term paper on a specific non-ferrous material.
- D. Individual projects assigned by instructor on metallurgical process.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, Lab reports

Writing
20 - 25%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, Field work, Lab reports

Problem solving
15 - 25%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items, Completion

Exams
55 - 60%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
