COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, the student will be able to:

1. Select appropriate crops for Sonoma County.
2. Evaluate various potting mixes for seed starting.
3. Compare and contrast the benefits of on-farm transplant production and purchase of commercially produced transplants.
4. Determine appropriate plant spacing and planting arrangements for optimal crop production.
5. Prepare a raised garden bed.
6. Collect and analyze representative soil samples.
7. Amend soil with organic fertilizers to meet crop nutrient needs and pH preferences.
8. Determine optimal harvest time for a given crop.
9. Discuss effective storage requirements to eliminate crop deterioration.
10. Evaluate marketing channels appropriate to Sonoma County.
11. Determine crop density based on square footage of space available.
12. Identify pest pressures and apply appropriate pest management treatments.

Topics and Scope:

- I. Orientation to the Food Pyramid Garden (FPG)
 - A. Background
 - B. History of site
 - C. Purpose
 - D. Long-term vision
 - E. Overview of Food Pyramid Garden components
 1. grains
 2. vegetables
 3. fruit

4. protein
5. dairy
6. sugars and oils
- II. Spring Farm Management/Planning
 - A. Financial planning
 1. budget
 2. income/expense
 3. record keeping
 - B. Community relations/outreach
- III. Soil Fertility Management
 - A. Soil testing and analysis
 1. soil pH
 2. soil nutrients
 3. percentage organic matter
 - B. Organic soil amendments
 - C. Cover crop planting
 - D. Crop rotation
- IV. Spring Cultural Practices
 - A. Tillage
 - B. Integrated Pest Management (IPM)
 1. pest pressures
 2. pest management treatments
 - C. Irrigation
 - D. Fertilization
 1. calculating material to meet crop nutrient needs
 2. application methods
 - E. Cover crop incorporation
- V. Spring Planting
 - A. Appropriate crops
 - B. Seeds
 1. ordering the appropriate seeds
 2. proper storage
 - C. Transplants
 - D. Care of seedlings/transplants
- VI. Planting Plans
 - A. Field layout
 1. spacing
 2. companion planting
 3. Yield calculations
 - B. Planting intervals for continuous harvest

Assignment:

Assignments may include:

1. Prepare potting mix based on crop and soil needs.
2. Develop an advertising tool for the FPG.
3. Prepare a detailed plot plan for planting various sections of the FPG.
4. Assigned reading, 15 - 20 pages per week.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Prepare potting mix; plot plan; advert. strategy.

Problem solving
80 - 90%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

None

Exams
0 - 0%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation.

Other Category
10 - 20%
