**Catalog Description:**

This course is an intermediate algebra course which incorporates the use of technology. The topics in this course include functions, equations and inequalities in one variable, systems of linear equations in two or three variables, exponential and logarithmic functions and equations, and discrete topics. Graphing calculators and/or computer algebra systems will be incorporated into the above, as appropriate.

**Prerequisites/Corequisites:**

MATH 151 or MATH 150B.

**Recommended Preparation:****Limits on Enrollment:****Schedule of Classes Information:**

Description: Standard intermediate algebra course. (Grade or P/NP)

Prerequisites/Corequisites: MATH 151 or MATH 150B.

Recommended:

Limits on Enrollment:

Transfer Credit:

Repeatability: Two Repeats if Grade was D, F, NC, or NP

## **COURSE CONTENT**

### **Outcomes and Objectives:**

To be successful, students should be able to:

1. Solve linear, quadratic, and radical equations in one variable.
2. Apply elementary methods and theory in solving higher-degree polynomial equations.
3. Define function, domain, and range, and perform operations with functions using functional notation.
4. Graph linear and quadratic equations.
5. Solve systems of linear equations.
6. Simplify expressions involving rational expressions.
7. Simplify expressions involving rational exponents.
8. Solve exponential and logarithmic equations, including those with common and natural logarithms.
9. Apply properties of exponents and logarithms in simplifying expressions and solving equations.
10. Apply topics to modeling and applications.
11. Incorporate use of technology, as appropriate, to the above topics.

### **Topics and Scope:**

#### **USE OF TECHNOLOGY**

Emphasis of the course is on graphing technology to demonstrate algebraic concepts and to observe and predict the behavior of functions, process information, and manipulate structures such as matrices and summations.

#### **FUNCTIONS AND EQUATIONS**

Definition of function, function notation, evaluation, domain, and range.  
Graphs of functions to include polynomial, radical, and absolute value.

Graphical and algebraic solutions to equations and inequalities that involve these functions. Solution of literal equations. Applications to emphasize mathematical models that use polynomial, rational, and radical functions.

### SYSTEMS OF EQUATIONS/INEQUALITIES

Solution of linear systems, Matrices and RREF Form, Systems of linear inequalities, Applications and modeling.

### EXPONENTIAL AND LOGARITHMIC FUNCTIONS AND EQUATIONS

Common and natural logarithms, Graphs, the number e, Laws of logarithms, Solving exponential and logarithmic equations. Applications and modeling

### DISCRETE TOPICS

Introduction to sequences and series, Summation notation, Factorial notation, Pascal's Triangle, Binomial Coefficients, and Binomial expansion. Applications and modeling.

### Assignment:

1. The student will have daily outside reading, problem set assignments from required text(s), or instructor chosen supplementary materials.
2. Instructional methodology may include, but not limited to: lecture, demonstrations, oral recitation, discussion, supervised practice, independent study, outside project or other assignments.

### Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing  
0 - 0%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, Exams

Problem solving  
15 - 40%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Performance exams

Skill Demonstrations  
50 - 75%

**Exams:** All forms of formal testing, other than skill performance exams.

Multiple choice

Exams  
5 - 25%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

WRITING ASSIGNMENTS

Other Category  
0 - 10%

**Representative Textbooks and Materials:**

Text(s) required of each student will be selected by the department, a committee of the department, or the responsible instructor from the books currently available. Choices in the past have included:

INTERMEDIATE ALGEBRA: CONCEPTS & APPLICATIONS (5th) by Marvin L. Bittinger Mervin L. Keedy, & David Ellenbogen, Massachusetts: Addison-Wesley 1997.

INTERMEDIATE ALGEBRA (2nd), Martin-Gay, Houghton-Mufflin, 1997.
