Catalog Description:

An introduction to the fundamental facts and principles of chemistry including atomic theory, bonding, stoichiometry, kinetic-molecular theory, properties of mixtures, the periodic table, and thermodynamics. First semester of a one year program of general chemistry.

Prerequisites/Corequisites:

Chemistry 51 or Chemistry 55 or placement on the Chemistry Diagnostic Test AND Math 155 or two years of high school algebra or equivalent.

COURSE CONTENT

Outcomes and Objectives:

After successful completion of this course, a student will be able to:

1. Use dimensional analysis and solve equations to perform calculations and solve word problems related to chemistry-specific topics.
2. Safely obtain accurate measurements in a laboratory setting and identify the uncertainty associated with those measurements.
3. Sort, graphically represent, interpret, and communicate in writing the results of laboratory experiments and analyze experimental error associated with those results.
4. Relate observed macroscopic behavior to microscopic phenomena in terms of the kinetic molecular theory.
5. Describe matter and its transformations according to the atomic theory, the theories of chemical bonding, and the writing and classification of balanced chemical equations.
6. Relate chemical reactions to associated changes in energy.
7. Correctly identify, name, and write the formula for inorganic compounds.
8. Recognize trends in chemical properties as related to the periodic

- table of the elements, and use data on the periodic table of elements to perform calculations.
9. Apply chemical principles to real world situations.

Topics and Scope:

LECTURE MATERIAL

1. Matter
2. Scientific Measurement/Uncertainty
3. Atomic Theory
4. Bonding and Molecular Shape
5. Inorganic Nomenclature
6. The Mole
7. Calculations and chemical reactions
8. Types of Chemical Reactions
9. Microscopic Picture of the States of Matter
10. Gas Laws
11. Thermodynamics
12. Periodic Trends
13. Intermolecular Forces
14. Properties of mixtures

LABORATORY MATERIAL

1. Laboratory Safety
2. Laboratory techniques
 - a. the measure and transfer of liquids
 - b. determining mass using a balance
 - c. creating solutions of known concentration
3. Maintaining a Laboratory Data Notebook
4. Graphing data obtained in the laboratory
5. Analysis of yields and experimental errors obtained in the laboratory
6. Writing laboratory reports

Assignment:

1. Specific reading and study assignments from the lecture textbook
2. Completion of recommended end-of-chapter problems
3. Laboratory experiments and accompanying reports
4. Midterm Exams, Quizzes, Final Exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, Lab reports

Writing 10 - 20%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, Lab reports, Exams	Problem solving 40 - 70%
Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.	
Class performances, LAB SKILL TECH/ACCUR LAB RSLTS	Skill Demonstrations 5 - 20%
Exams: All forms of formal testing, other than skill performance exams.	
Multiple choice, Completion, PROB SOLVING & SHORT ESSAY	Exams 15 - 35%
Other: Includes any assessment tools that do not logically fit into the above categories.	
Attendance and participation, assignments submitted on time, improvement demonstrated on final exam.	Other Category 0 - 5%
