Certificate Applicable Course

COURSE CONTENT

Outcomes and Objectives:

The students will:

1. Evaluate common management practices of farm animals health, nutrition, genetics, and reproduction.
2. Identify minimum of six common breeds of beef, sheep, horses, hogs, dairy, and poultry and assess their differences.
3. Analyze the functions and advantages of different livestock enterprises in relation to demographics.

Topics and Scope:

1. Livestock Industry.
 - a. general
 1. terminology
 2. functions of a livestock enterprise
 3. advantages of livestock farming
 4. species; production, and descriptive cycle of production of each
 - b. U.S.
 1. major agriculture regions of U.S. and rank of each species.
 2. numbers of livestock in U.S.; comparison with other countries in production of livestock and products.
 3. meat consumption in U.S.
 - c. California.
 1. major regions in California and types of livestock
 2. numbers of livestock in California

3. consumption and production of each type of livestock
4. factors affecting amount of production possibilities of expansion or reduction of production competition from other sources
2. Principles of Livestock.
 - a. phases and types of production
 - b. management
 - c. establishing the enterprise
 - d. breeds and breeding - genetics and physiology
 - e. feeds and feeding - nutrition and chemistry
 - f. health - anatomy and physiology
 - g. marketing - economics
 - h. product - food technology
3. Practices of Livestock Production - Applied Skills.
 - a. phases, types, and cycle of production of each species
 1. swine
 2. poultry
 3. sheep
 4. beef
 5. dairy

Assignment:

Students will be required to:

1. Reading assignments that will average 30 pages per week.
2. Writing assignments, worksheet, study guide, class notes that will average 7 pages/week.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, Reading reports, Essay exams

Writing
10 - 25%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, Quizzes, Exams, WORKSHEETS

Problem solving
10 - 25%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Performance exams

Skill Demonstrations
15 - 25%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items, Completion

Exams
50 - 90%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
