COURSE CONTENT

Outcomes and Objectives:

1. Plan and implement nursing care for patients with complex medical surgical conditions.

2. Assist with the development of written nursing care plans of assigned patients.

3. Accurately administer and record medications and treatments for the assigned patients.

4. Demonstrate necessary skills for the administration of injectable medications.

5. Demonstrate ability to assess wounds, remove staples/sutures using principles of universal precautions and asepsis.

6. Apply principles of intravenous therapy in the clinical setting by recognizing signs/symptoms of infiltration, accurately calculating drip rates and recognizing appropriate solutions and maintaining patency.
7. Apply principles of therapeutic communication with assigned patients.

Topics and Scope:

1. Nursing Care Plans reflective of comprehension of anatomy,

physiology, and pharmacology as it relates to the disease conditions:

- A. Musculoskeletal system.
- B. Integumentary system.
- C. Nervous system.
- D. Sensory system.
- E. Circulatory system.
- F. Respiratory system.

- G. Digestive system.
- H. Urinary system.
- I. Endocrine system.
- J. Reproductive system.

Assignment:

- 1. Nursing Care Plans: Weekly for assigned (1-2) patients.
- 2. Problem Solving Case Study: One on assigned patient.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Term papers, FRACTIONAL DOSAGE EXAM

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Performance exams, Clinical evaluation

Exams: All forms of formal testing, other than skill performance exams.

None

Other: Includes any assessment tools that do not logically fit into the above categories.

None
