COURSE CONTENT

Outcomes and Objectives:

The student will:

1. Use the architectural scale to interpret drawings and to prepare sketch assignments.
2. Analyze architectural drawings and describe the relationships between them.
3. Retrieve information from architectural working drawings including: Site Plan, Floor Plan, Foundation and Floor Framing Plan, Roof Framing Plan, Sections, Details, Exterior and Interior Elevations and Utility Plans, and consultant drawings including: structural, electrical, mechanical and plumbing.
4. Identify architectural symbols used in construction drawings and use them to prepare sketch assignments.
5. Analyze working drawing information as it relates to Code requirements.
6. Evaluate working drawing information as it relates to specification requirements.
7. Synthesize working drawing content by preparing sketch solutions to problems.

Topics and Scope:

1. Introduction to the design process for non-residential buildings
 - a. Professional roles
 - b. Documentation (working drawings & specifications)
2. Review of scale use
 - a. Measuring components of working drawings

- b. Preparing sketches
- 3. Review of freehand sketching & lettering techniques
 - a. Use of tools
 - b. Professional Standards
- 4. Creating orthographic projections
 - a. 3-view drawings
 - b. Elevations
 - c. Sections
- 3. Symbols and conventions used in architectural working drawings
- 4. Working Drawing types and relationships
 - a. Site Plan
 - b. Floor Plan,
 - c. Foundation and Floor Framing Plan
 - d. Roof Framing Plan
 - e. Sections
 - f. Details
 - g. Exterior and Interior Elevations
 - h. Utility Plans
- 5. Working drawing content by drawing type, and consultant drawings
 - a. Structural
 - b. Electrical
 - c. Mechanical and plumbing
- 6. Common non-residential Code requirements
 - a. Relationship to plan check documents
 - b. relationship to drawings.
- 7. Common non-residential specification information and relationship to drawings
 - a. Organization
 - b. Division content
 - c. Description of materials
- 8. Coordination of architectural drawings with structural, electrical, mechanical and plumbing plans

Assignment:

- 1. Readings in text.
- 2. Completing exercises from text.
- 3. Sketching technique exercises.
- 4. Interpreting working drawings.
- 5. Interpreting common non-residential Code requirements.
- 6. Interpreting common non-residential specifications information.
- 7. Sketching solutions to problems.
- 8. Written assignments involving analysis and synthesis of course material.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework	Writing 10 - 20%
Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.	
Homework problems, Quizzes, Exams	Problem solving 25 - 40%
Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.	
Class performances, Performance exams	Skill Demonstrations 25 - 40%
Exams: All forms of formal testing, other than skill performance exams.	
Multiple choice, True/false, Matching items, Completion	Exams 20 - 30%
Other: Includes any assessment tools that do not logically fit into the above categories.	
CLASS PARTICIPATION	Other Category 5 - 10%
