COURSE CONTENT

Outcomes and Objectives:

Upon successful completion of this course, the student will be able to:

1. Accurately use the metric, apothecary, avoirdupois and household systems to count and measure.
2. Compare and contrast the advantages and disadvantages of various topical, transdermal, rectal, ophthalmic, nasal, oral, and otic dosage forms.
3. Recognize specific uses for various topical, transdermal, rectal, ophthalmic, nasal, oral, and otic dosage forms.
4. Determine the different storage requirements and safety considerations of various classifications of pharmaceuticals.
5. Select proper containers for packaging of pharmaceutical preparations.
6. Describe proper compounding, labeling, and documentation for topical, transdermal, rectal, ophthalmic, nasal, oral, and otic dosage forms.

Topics and Scope:

I. Review of common pharmaceutical measuring systems and equipment

II. Topical dosage forms

A. Factors affecting absorption

B. Definition and terminology

1. Uses
2. Solutions
3. Lotions
4. Creams
5. Ointments
6. Pastes
7. Liniments

8. Tinctures
 9. Collodions
 10. Aerosols
 11. Inhalants
 12. Sprays
 13. Powders
 14. Demonstration: Extemporaneous compounding and packaging of solutions, lotions, creams, ointments, pastes, and powders
 15. Transdermal drug delivery systems
 - a) Designs
 - b) Use
- III. Rectal dosage forms
- A. Local vs. systemic use
 - B. Ointments & Creams
 - C. Lotions
 - D. Suppositories
 - E. Demonstration: Extemporaneous compounding and packaging of pharmaceuticals administered by suppository
- IV. Ophthalmic dosage forms
- A. Sterile preparation
 - B. Solutions
 - C. Suspensions
 - D. Semi-solids
 - E. Storage
- V. Otic dosage forms
- A. Preparation
 - B. Uses
- VI. Practical dispensing
- A. Patient profile
 - B. Product identification
 - C. Label
 - D. Auxiliary labels
 - E. Packaging and containers
- VII. Storage requirements and safety considerations
- VIII. Drug classification
- A. Generic names
 - B. Trade names
 - C. Common therapeutic uses
 - D. Usual doses

Assignment:

1. Read 10-15 pages a per week
2. Answer critical thinking questions at the end of each chapter
3. Written patient projects (8)
4. Two tests and a final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, written patient projects

Writing
30 - 40%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving
0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice

Exams
55 - 65%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation

Other Category
5 - 10%
