Catalog Description:

This course encompasses critical evaluation and discussion of selected viticulture, plant pathology and entomology research papers. The papers will be recent publications in peerreviewed journals. The intent is to broaden student experience and perspective beyond textbooks for understanding of new pest and disease management practices.

Prerequisites/Corequisites:

Recommended Preparation: Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Upon completion of this course, the student will be able to:
- 1) Read and comprehend current plant pest and disease research publications.
- 2) Synthesize and summarize contemporary integrated pest and disease management issues.
- 3) Incorporate the latest pest and disease management findings into vineyard management decisions when appropriate.

Objectives:

Upon successful completion of this course, the student will be able to:

- 1. Read and comprehend vine pathology and entomology research publications.
- 2. Discuss new concepts regarding pest and disease control.
- 3. Summarize key points in a vine pathology and/or entomology research article from a peer-reviewed journal.
- 4. Evaluate the theories underlying the research.

5. Identify resources/locations for finding the latest vine pathology and entolomogy research publications.

6. Evaluate the appropriateness of integrating research findings into a specific vineyard site management plan.

Topics and Scope:

- I. Overview of research paper format
 - A. Abstract
 - B. Introduction / Literature review
 - C. Materials and methods
 - D. Results

- E. Presentation of the data
 - 1. Tables
 - 2. Figures
 - 3. Statistics
- F. Discussion
- G. Conclusion
- H. References
- II. Examples of contemporary vineyard issues
 - A. Genetically modified grapevines for disease and pest control
 - B. Soil microorganisms that can prevent vine disease
 - C. Pest and disease control methods without the use of pesticides and/or chemicals
 - D. Organic viticulture practices and regulations
 - E. Biodynamic viticulture
 - F. Hyperparasitism
 - G. Development and testing of new beneficial insects
 - H. New concepts and topics recently published for repeatability

Assignment:

1. Reading (15-20 pages/week)

2. Written summary of research papers (3-5 pages each). The student will write an abstract for each of the four publications, highlighting the important points and including key words.

- 3. Develop a list of questions for each research publication
- 4. Exams

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Summaries; questions for each paper

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Exams: All forms of formal testing, other than skill performance exams.

Midterm and final exam: matching items, Short answer; fill-in

Writing 45 - 60%

Problem solving 0 - 0%

Skill Demonstrations 0 - 0%

> Exams 15 - 25%

Participation and discussion

Other Category 20 - 30%
